ACHIEVEMENT STANDARD 91012 (1.6)

Describe aspects of a contemporary New Zealand geographic issue

Achievement Standard Number: 91012; Version 3

CREDITS: 3

TASK 1: DESCRIBE THE NATURE OF THE CONTEMPORARY GEOGRAPHIC ISSUE

a) Describe the issue and describe the locations of the area where the issue has arisen. (200 words)

The current transportation system that the Auckland residents rely upon has been found to be increasingly unsustainable, due to the rapidly growing rate of urbanization and population number, which now stands at 1.6 million. Congestion within Auckland has become significantly worse, with the number of cars predominately contributing to this issue being 1.15 million and consisting of 80% of Auckland's traffic, compared to buses, taxis and ferries which cause less than 1% of congestion in Auckland. In theory, as the population increases, so will the number of car-users, which now in 2019 has truly begun to outweigh the number of vehicles that the Auckland transport system can manage. To help relieve the pressure this has placed, electric Lime e-scooters have been introduced to the streets in numerous areas across the country, including Christchurch, Dunedin, Hutt Valley, but specifically in Auckland where congestion issues have reached an all-time high. However, with the establishment of this new transport option, although it may come with a variety of benefits, it has begun to call into question numerous social sustainability issues. Whilst being an economically and environmentally viable option, it has raised doubts over whether the transport method encourages a safe and secure community. The issue at hand is finding out if the pros outweigh the cons of using these electric scooters, demonstrating whether or not they are a suitable transport option for Aucklanders.

b) On a map of New Zealand, locate and label the region(s) where this issue has arisen.

Auckland City, 36.8485° S, 174.7633° E. Estimated number of 700 Lime scooters across the city, with plans to increase to 1,000. Has many concentrated areas of traffic, being ranked at least 40th out of 4,037 cities (in the world) for congestion rates.

Hutt Valley (Wellington region) including upper and lower Hutt, is a large expanse of area in the Wellington region. Estimated number of 600 Lime scooters in the total area. Hutt Valley experiences some traffic issues, not on the same scale that Aucklanders face, with the increasing congestion of SH2.

Dunedin city, 45.8788° S, 170.5028° E. Dunedin has the highest estimated number of Lime scooters, with the current number at 700, with plans to increase that to 1,000. Dunedin has also experienced an increasing number of traffic spikes, such as congestion in a portion on the Queenstown highway growing by 76% since 2013.

Christchurch city, 43.7538° S, 172.7779° E. Estimated number of Lime Scooters are 500, and due to the growing success, there are plans to increase that number to at least 700. Christchurch also faces growing traffic congestion issues with 83% of it wider population choosing to drive to work.
