The Archaean Geology of the Kaapvaal Craton, Southern Africa Alfred Kröner, Axel Hofmann, 2019-02-20 This book provides a comprehensive overview of the evolution of one of the oldest and best exposed Archaean cratons on this planet. There is currently a renewed interest in the early Earth and the Kaapvaal craton has long served as a model for early crustal evolution. This unique multidisciplinary resource features information on geology, tectonics, geochemistry and geochronology. It offers a wealth of new data on various aspects of the craton as well as contributions on the various crustal units by international specialists.

Sustainability of Southern African Ecosystems under Global Change Graham P. von Maltitz, Guy F. Midgley, Jennifer Veitch, Christian Brümmer, Reimund P. Rötter, Finn A. Viehberg, Maik Veste, 2024-01-05 This open access book about the sustainability of marine and terrestrial ecosystems in southern Africa provides a synthesis of the research program Science Partnerships for the Adaptation to Complex Earth System Processes SPACES II 2018-2022. It addresses the scientific, social and economic issues related to climate change, its potential impacts on the various ecosystems, adaptations and management interventions for enhancing systems resilience in Southern Africa. It is written by numerous scientists from African states and Germany and summarizes the latest research findings which are of great relevance for a better understanding of climate change impacts, adaptations and vulnerabilities as well as for developing management options and policy options to reduce the associated risks. This is crucial considering that the projected African population increase is exceptional. Furthermore, climate change is assumed to hit southern Africa extremely hard with a significant increase in extreme events and the frequency of severe droughts, heat waves and flooding. Southern Africa hosts a high variety of ecosystems which belongs to important biodiversity hotspots for unique flora and fauna. The surrounding oceans form in turn a bottle neck within the ocean's global thermohaline circulation, act as a still poorly understood carbon sink and source and play an important role for fisheries as they are highly productive. Considering these important aspects, the book is an important interdisciplinary contribution to the scientific literature and will find a wide readership. The book is aimed at students, teachers and scientists in the fields of terrestrial and marine ecology, environmental nature and landscape planning, agriculture, environmental and resource management, biodiversity and nature conservation as well as scientists and representatives in specialised authorities and associations, nature conservationists and policy makers of related disciplines.

The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021 This Handbook provides a detailed and wide ranging coverage of the key economic questions in South Africa, concentrating on the more recent economic challenges facing the country.

Advanced Organic Waste Management Subrata Hait, Chaudhery Mustansar Hussain, 2022-01-06 *Advanced Organic Waste Management: Sustainable Practices and Approaches* provides an integrated holistic approach to the challenges associated with organic waste management, particularly related to sustainability, lifecycle assessment, emerging regulations and novel approaches for resource and energy recovery. In addition

to traditional techniques such as anaerobic digestion composting innovative and emerging techniques of waste recycling like hydrothermal carbonization and vermicomposting are included The book combines the fundamentals and practices of sustainable organic waste management with successful case studies from developed and developing countries highlighting practical applications and challenges Sections cover global organic waste generation encompassing sources and types composition and characteristics focus on technical aspects related to various resource recovery techniques like composting and vermicomposting cover various waste to energy technologies illustrate various environmental management tools for organic waste present innovative organic waste management practices and strategies complemented by detailed case studies introduce the circular bioeconomy approach and more Presents the fundamentals and practices of sustainable organic waste management with emerging regulations and up to date analysis on environmental management tools such as lifecycle assessment in a comprehensive manner Offers the latest information on novel concepts and strategies for organic waste management particularly zero waste and the circular bioeconomy Includes the latest research findings and future perspectives of innovative and emerging techniques of waste recycling such as hydrothermal carbonization and vermicomposting

Climate Change and Water Resources in Africa Salif Diop, Peter Scheren, Awa Niang, 2021-02-15

The focus of this book is on the key water related vulnerabilities to climate change in Africa particularly in its most vulnerable areas exploring potential management responses to such vulnerabilities The African countries are particularly exposed and vulnerable to the negative impacts of climate change with important impacts on water resources and hydrological systems water availability water resource management and sea level variations Already under various anthropogenic pressures the status of water resources in Africa has been changing over the past decades with decreasing water quality falling groundwater levels and variability in rainfall both in terms of timing and intensity Climate change will further accelerate the rate of change affecting the ability of people and societies to respond in a timely manner It is clear that there is no quick fix to the pressures imposed on water resources by climate change Increasing the resilience of ecosystems and communities to extreme events such as flooding and drought and integrating climate change risks and opportunities into development decision making is indeed a key challenge as much a technical climate change one as a political and developmental challenge The book in this regard intends to contribute to the debate around climate change in relation to water resources management in Africa and in particular inform policy decisions and actions that will improve governments and communities ability to manage the challenges of climate change and variability in relation to the aquatic ecosystems that they depend on The knowledge collected in this book will benefit policy makers researchers as well as other stakeholders

Speed Breeding Systems For Food Kenny Paul, Nagesh Kancharla, Kshipra Gautam, Marina Ceran, 2024-10-17 Speed breeding systems for sustainable food production offer a promising solution to address food security and environmental sustainability Speed breeding technologies allow accelerating generation of new plant varieties with desired traits in a short

period These systems include genetic selection vertical hydroponics and data driven smart sensor applications Quick generation of plant varieties is achieved by manipulating photoperiods of a native plant with extended light periods in a controlled environment to fasten the crop cycle This allows for multiple plant generations to be grown and harvested in a single year rather than the typical one to two generations in traditional field based breeding The application of molecular markers in the analysis of crop genomes enables the identification and characterization of genetic variation within a crop species This in turn helps breeders in identifying and selecting plants with desirable traits such as resistance to pests or diseases or improved yield Marker assisted selection MAS and genomic selection GS are two recent methods that revolutionized plant breeding to improve the efficiency and accuracy of selecting desirable traits MAS allows breeders to identify desirable traits earlier in the breeding process without having to wait for the traits to be phenotypically expressed On the other hand GS allows breeders to predict the performance of a plant before it is even grown and can help speed up the breeding process by allowing breeders to select plants with desirable traits much earlier in the breeding process

Freedom in the World 2017 Freedom House,2017-12-21 Freedom in the World the Freedom House flagship survey whose findings have been published annually since 1972 is the standard setting comparative assessment of global political rights and civil liberties The survey ratings and narrative reports on 195 countries and fifteen territories are used by policymakers the media international corporations civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide The Freedom in the World political rights and civil liberties ratings are determined through a multi layered process of research and evaluation by a team of regional analysts and eminent scholars The analysts used a broad range of sources of information including foreign and domestic news reports academic studies nongovernmental organizations think tanks individual professional contacts and visits to the region in conducting their research The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights and these standards are applied to all countries and territories irrespective of geographical location ethnic or religious composition or level of economic development

The African Food Environments Amos Laar,Kaleab Baye,Anna Lartey,Francis Zotor,Gershim Asiki,2023-09-05 In many respects the continent of Africa is in transition Prominent among them currently is the nutrition transition One consequence of the nutrition transition is the increase in prevalence of nutrition related non communicable diseases NCDs such as obesity type 2 diabetes cardiovascular diseases and certain cancers Although NCDs are a global public health problem the rate of increase in NCDs morbidity and mortality in some African countries is staggering This surge has been linked to modifiable environmental factors factors that facilitate the consumption of obesogenic energy dense nutrient poor foods rather than unrefined cereals fruits and vegetables It has long been recognized that the physical and social environments in which people live work and eat are critical determinants of their health More recently there has been a greater focus on the food environment as a key determinant of health Available

evidence shows that unhealthy food environments drive unhealthy diets and unhealthy diet is one of four main risk factors for NCDs

Mycotoxins in Plants and Plant Products Martin Weidenbörner, 2017-05-10 This book provides detailed data and information about the cereals and cereal products that are affected by mycotoxins and gives a basic overview of mycotoxins in these foodstuffs. Mycotoxin contamination of food occurs as a result of crop invasion by field fungi such as *Fusarium* spp and *Alternaria* spp or storage fungi such as *Aspergillus* spp and *Penicillium* spp which can grow on in stored commodities and are able to produce mycotoxins. In the worst case these fungi produce secondary metabolites called mycotoxins which can be very harmful to humans and animals when for example they are consumed through food due to their various negative effects on several organs in both humans and animals. *Mycotoxins in Plants and Plant Products* Cereals and Cereal Products lists the predisposition of a foodstuff for mycotoxin contamination as well as the degree of contamination concentration and country of detection origin for each case of mycotoxin contamination of this kind of foodstuff. It includes both alphabetical and numerical lists of literature.

Satellite Remote Sensing of Terrestrial Hydrology Christopher Ndehedehe, 2022-07-15 This book highlights several opportunities that exist in satellite remote sensing of large scale terrestrial hydrology. It lays bare the novel concept of remote sensing hydrology and demonstrates key applications of advance satellite technology and new methods in advancing our fundamental understanding of environmental systems. This includes using state of the art satellite hydrology missions like the Gravity Recovery and Climate Experiment and other multi mission satellite systems as important tools that underpin water resources planning and accounting. This book discusses and demonstrates how the efficacy simplicity and sophistication in novel computing platforms for big earth observation data can help facilitate environmental monitoring and improve contemporary understanding of climate change impacts on freshwater resources. It also provides opportunities for practitioners and relevant government agencies to leverage satellite based information in a transdisciplinary context to address several environmental issues affecting society. This book provides a general framework and highlights methods to help improve our understanding of hydrological processes and impact analysis from extreme events e.g droughts floods and climate change.

Nanobiotechnology in Bioformulations Ram Prasad, Vivek Kumar, Manoj Kumar, Devendra Choudhary, 2019-07-04 With the recent shift of chemical fertilizers and pesticides to organic agriculture the employment of microbes that perform significant beneficial functions for plants has been highlighted. This book presents timely discussion and coverage on the use of microbial formulations which range from powdered or charcoal based to solution and secondary metabolite based bioformulations. Bioformulation development of biofertilizers and biopesticides coupled with the advantages of nanobiotechnology propose significant applications in the agricultural section including nanobiosensors nanoherbicides and smart transport systems for the regulated release of agrochemical. Moreover the formulation of secondary metabolites against individual phytopathogens could be used irrespective of geographical positions with higher disease incidences. The prospective advantages and uses of nanobiotechnology generate tremendous

interest as it could augment production of agricultural produce while being cost effective both energetically and economically This bioformulation approach is incomparable to existing technology as the bioformulation would explicitly target the particular pathogen without harming the natural microbiome of the ecosystem Nanobiotechnology in Bioformulations covers the constraints associated with large scale development and commercialization of bioinoculant formations Furthermore exclusive emphasis is be placed on next generation efficient bioinoculants having secondary metabolite formulations with longer shelf life and advanced competence against several phytopathogens Valuable chapters deal with bioformulation strategies that use divergent groups of the microbiome and include detailed diagrammatic and pictorial representation This book will be highly beneficial for both experts and novices in the fields of microbial bioformulation nanotechnology and nano microbiotechnology It discusses the prevailing status and applications available for microbial researchers and scientists agronomists students environmentalists agriculturists and agribusiness professionals as well as to anyone devoted to sustaining the ecosystem **Integrated Drought Management, Volume 2** Vijay P.

Singh,Deepak Jhajharia,Rasoul Mirabbasi,Rohitashw Kumar,2023-09-12 The second volume of this comprehensive global perspective on Integrated Drought Management is focused on drought modeling meteorological prediction and the use of remote sensing in assessing analyzing and monitoring drought It discusses risk management planning policy and societal impacts of drought such as water pricing water transfer water quality and crop insurance Through numerous case studies from India Iran Brazil the US Nepal and other countries that cover a broad range of topics and geographical regions this volume serves as a valuable resource for all professionals researchers and academics who want to advance their knowledge about droughts Features Provides a global perspective on drought prediction and management and a synthesis of the recent state of knowledge Covers a wide range of topics from essential concepts and advanced techniques for forecasting and modeling drought to societal impacts consequences and planning Presents numerous case studies with different management approaches from different regions and countries Addresses how climate change impacts drought the increasing challenges associated with managing drought decision making and policy implications Includes contributions from hundreds of experts from around the world Professionals researchers academics and postgraduate students with knowledge in environmental sciences ecology agriculture forestry hydrology water resources engineering and earth sciences as well as those interested in how climate change impacts drought management will gain new insights from the experts featured in this two volume handbook *The Archaeology of Southern Africa* Peter Mitchell,2024-06-06 This revised and updated edition provides a

comprehensive synthesis of Southern Africa s archaeology over more than 3 million years Earth as an Evolving Planetary System Kent C. Condie,2021-09-18 Earth as an Evolving Planetary System Fourth Edition discusses key topics dealing with the evolution and interaction through time of Earth s crust mantle core atmosphere hydrosphere and biosphere It addresses the questions of why Earth is unique among planets of the solar system and how the various subsystems in the planet have

interacted over 4.6 billion years in the habitable planet that we live on. This new edition includes over 100 new pages of material data and images and is a key reference for students and researchers in Earth and planetary sciences. Earth as an Evolving Planetary System. Fourth Edition includes new material that has become available since the third edition, including new sections on the Mid-lithosphere discontinuity, geoneutrinos, mantle oxidation, continental emergence, Earth cycles, new chapter and recycling processes, the evolution of Earth from a stagnant lid to a plate tectonic regime, the controversy over how the continents have grown when plate tectonics began, and exoplanets. Presents comprehensive coverage of the Earth's interacting systems through time. Compares and contrasts Earth to other terrestrial planets with very different histories. Includes a new and exciting chapter on Earth's cycles and their possible origins.

Tectonic Development, Thermal History and Hydrocarbon Habitat Models of Transform Margins: their Differences from Rifted Margins M. Nemčok, H. Doran, A. G. Doré, L. Ledvényiová, S. Rybár, 2023-07-21

Transform margins form a significant portion of Earth's continent-ocean transition and are integral to continental break-up, yet compared to other margins are poorly understood. This volume brings together new multidisciplinary research to document the structural, sedimentological and thermal evolution of transform margins, highlighting their relationship to continental structure, neighbouring oceanic segments, pull-apart basins and marginal plateaus. Special emphasis is given to the comparison of transform and rifted margins and to the economic implications of transform margin structure and evolution. Transform case studies include the Agulhas, Falkland, transform, Coromandel, transform, East India, Davie margin and Limpopo, transform, East Africa, Guyana, transform, margin, Demerara, transform, margin, Suriname, Romanche and St Paul, transforms, equatorial Africa, Sagay, transform, Andaman Sea and Zenith, Wallaby, Perth, transform, West Australia. The broad-scale interplay between transform and rifted margin segments in the North and Central Atlantic and Caribbean is also examined.

Aerosols and Precipitation Over Africa Akintomide A. Akinsanola, Adeyemi A. Adebisi, 2025-03-14. Aerosols and Precipitation Over Africa: Progress, Challenges and Prospects provides a clear picture of the complex interactions between aerosols and precipitation over Africa. The text begins with a close look at aerosol distribution, observational and modeling techniques, and climate models. This is followed by an examination of the effect of aerosol on precipitation and the latest advances in aerosol precipitation studies. The editors then review regional and large-scale variability. Later chapters include a climatological assessment of aerosol and precipitation properties, projected changes in precipitation and cloud patterns, and expected challenges for the future. With these interactions confounded by the large-scale dynamical systems over the continent, this book will provide a much-needed detailed understanding of the complex connections between aerosol and precipitation over Africa. It will be a valuable resource for environmental researchers, academics, and policymakers studying the latest developments in aerosols and precipitation over Africa. Members of the Royal Meteorological Society are eligible for a 35% discount on all Developments in Weather and Climate Science series titles. See the RMetS member dashboard for the discount code. Provides detailed regional

sub regional insights and impacts on local climate Encompasses findings from both observations and climate models Looks to the future at projected changes and coming challenges in aerosol precipitation over Africa

Microalgae in Waste Water Remediation Arun Kumar,Jay Shankar Singh,2021-06-30 Microalgae in Waste Water Remediation aims to point out trends and current topics concerning the use of microalgae in wastewater treatment and to identify potential paths for future research regarding microalgaebased bioremediation To achieve this goal the book also assessing and analyzes the topics that attract attention among the scientific community and their evolution through time This book will be useful to the students scientists and policy makers concerned with the microalgae mediated management of wastewater effluents and its applications in overall future sustainable development

Political Ecology of REDD+ in Indonesia Jonas I. Hein,2018-11-21 Indonesia s commitment to reducing land based greenhouse gas emissions significantly includes the expansion of conservation areas but these developments are not free of conflicts This book provides a comprehensive analysis of agrarian conflicts in the context of the implementation of REDD Reducing Emissions from Deforestation and Forest Degradation and forest carbon offsetting in Indonesia a country where deforestation is a major issue The author analyzes new kinds of transnational agrarian conflicts which have strong implications for global environmental justice in the REDD pilot province of Jambi on the island of Sumatra The chapters cover the rescaling of the governance of forests privatization of conservation and the transnational dimensions of agrarian conflicts and peasants resistance in the context of REDD The book builds on an innovative conceptual approach linking political ecology politics of scale and theories of power It fills an important knowledge and research gap by focusing on the socially differentiated impacts of REDD and new forest carbon offsetting initiatives in Southeast Asia providing a multi scalar perspective It is aimed at scholars in the areas of political ecology human geography climate change mitigation forest and natural resource management as well as environmental justice and agrarian studies The Open Access version of this book available at <http://www.tandfebooks.com> doi view 10.4324/9781351066020 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Routledge Handbook of Food Waste Christian Reynolds,Tammara Soma,Charlotte Spring,Jordon Lazell,2020-01-13 This comprehensive handbook represents a definitive state of the current art and science of food waste from multiple perspectives The issue of food waste has emerged in recent years as a major global problem Recent research has enabled greater understanding and measurement of loss and waste throughout food supply chains shedding light on contributing factors and practical solutions This book includes perspectives and disciplines ranging from agriculture food science industrial ecology history economics consumer behaviour geography theology planning sociology and environmental policy among others The Routledge Handbook of Food Waste addresses new and ongoing debates around systemic causes and solutions including behaviour change social innovation new technologies spirituality redistribution animal feed and activism The chapters describe and evaluate country case studies waste management treatment prevention and reduction

approaches and compares research methodologies for better understanding food wastage This book is essential reading for the growing number of food waste scholars practitioners and policy makers interested in researching theorising debating and solving the multifaceted phenomenon of food waste **Biodiversity across Afromontane Environments** David
