to create new games in the genre Such activities highlight both the convergence of game and story and the collapsing distinction between reader and author Continually defying the forces of obsolescence fans return abandoned games to a playable state and treat stories as ever evolving narratives Similarly players of massive multiplayer games become co creators of the game experience building characters and creating social networks that recombine a reading and gaming community The interactions between storytellers and readers between programmers and creators and among fans turned world builders are essential to the development of innovative ways of telling stories And at the same time that fan activities foster the convergence of digital gaming and storytelling new and increasingly accessible tools and models for interactive narrative empower a broadening range of storytellers It is precisely this interactivity among a range of users surrounding these new platforms that is radically reshaping both e books and games and those who read and play with them
