**LA.6.1.7.3, LA.7.1.7.3, LA.8.1.7.3**

- The student will determine explicit ideas and information in text, including main idea, supporting details, implied message and inferences, and chronological order of events.

### Definition:

Making inferences involves using personal experience/background knowledge/schema, along with the information in the text, to make assumptions about what is NOT written. Interential thinking is often referred to as "reading between and beyond the lines." Inferring is required when part of the knowledge to understand a passage is found in the text but some is not. Thus, the student will have to use reasoning skills to predict outcomes and draw some logical conclusions.

**Essential Question(s):** *How will I reward the lesson objective(s) into a question(s) using student friendly terms?*

- What inferences can I draw based on evidence from the text?
- What role does background knowledge play in inferencing?
- How are observations and known information useful in making an inference?
- What words signal the reader to go beyond what is written to what is implied in the text?
- How do readers use text clues to make inferences?
- How do readers use background knowledge to make and confirm predictions?
