

Arranged Marriages are Less Successful

✓ Exclusively available on IvyPanda

Introduction

Marriage entails a union that establishes a lasting affiliation between two partners and remains significant in guiding people's lives. To realize a prosperous matrimonial life, an individual should choose an appropriate partner and sustain the relations by showing acceptance and understanding. Individuals select to marry for various reasons encompassing, love, wish to fulfill expectations, desire for children, companionship, physical attraction, and happiness (Parkin 273). Whereas the option of a marital partner is key when engaging in marriage, there are various standards when selecting a companion. Selecting a spouse can be attained through an arranged marriage or loving the identified person.

Recognizing the form of marriage that encourages the needs of modern societies is essential to enhancing family well-being. Both types of marriages have disadvantages and advantages and individuals have to navigate the challenges. Love marriages entail scenarios where partners are free to choose companions they feel compatible with while having ample time to know each other before settling on a marriage (Mohammadi 1). Contrarily, arranged marriages form a situation where individuals find themselves in union with a third-party chosen person based on family status, wealth, or other existing criteria (Sethi and Reiter 8). An arranged union comprises two persons who know less about the other partner before entering a marriage. Such a situation greatly impacts the quality of union, especially those in an arranged marriage. Factors such as commitment, intimacy, passion, and marital satisfaction viewed through the lens of human ecology and family development theories explain the less successful nature of arranged marriages.

Statement of Problem

Marital success is an essential, significant, and desirable area in human life. It permits the human and natural development of the community by establishing family units. Besides the influence on societal growth, marriages of better quality show a significant effect on the health, productivity, and life satisfaction of individuals.
