

Research Methodology in Strategic Management

Past Accomplishments and Future Challenges

Despite being a relatively young discipline, strategic management has grown dramatically in size and influence over the past few decades. As with any field, the findings generated within strategic management are only as robust as the research methods used to conduct the analyses. Although strategic management's accomplishments with regard to methods have been substantial, it is confronted by significant challenges as well. The authors describe these accomplishments and challenges, explain how the articles offered in this feature topic help to address certain challenges, and offer suggestions for future work that may create additional progress.

Keywords: *research methods; strategic management; strategy*

There is no doubt that interest in and attention to strategic management research has been increasing dramatically over time. For example, since its introduction in 1980, the *Strategic Management Journal (SMJ)* has grown from a nascent outlet devoted to an emerging field of study to become one of the most highly regarded and influential publications within the management discipline. The Business Policy and Strategy division of the Academy of Management has expanded from a small set of scholars in the early 1980s to more than 5,000 members. Today, the Business Policy and Strategy division is the second largest of the academy's 24 divisions and interest groups, trailing only the Organizational Behavior division. Not only has interest in strategic management increased, but the field's theories and ideas have profoundly influenced neighboring areas such as human resource management (e.g., Huselid, 1995; P. M. Wright, Dunford, & Snell, 2001) and organizational theory (e.g., Oliver 1991, 1997).

As is the case in any research area, the conclusions drawn within strategic management research are only as solid as the methodological practices that underlie the research. To the extent that strategic management studies are conducted appropriately with regard to design, sampling, measurement, analysis, and interpretation of results, confidence in the field's findings are increased. Unfortunately, content analyses focused on strategy research have
