

American Civil War Research Paper

The deadliest war in American history is known as the American Civil War killing nearly 620,000 soldiers and a mass amount of civilians. The War Between the States was fought between Southern slave states and the United States federal government. Southern states formed a group called the Confederacy, which went against the beliefs of the Union. Jefferson Davis of the Confederate States of America and Abraham Lincoln sought different views on slavery.

Lincoln believed that all slaves should be emancipated and advocated the restoration of the Union. The Fugitive Slave Law of 1850 supported the belief that all slaves who escaped, once captured were to be returned to their owners. This led to the 'War Governors' Conference on September 25, 1862 which included the meeting of thirteen Union governors who conversed between many different aspects of the war. The importance of this meeting routed from the war and the downfall that Abraham Lincoln was witnessing in the United States. As they discussed many reasons to abolish slavery, they believed that a substantial win would help the announcement of the proclamation. Slavery had a significant impact on society in a moral and economical aspect. The money had "strengthened the American economy in the north and south.

" Economically slaves who worked on plantations changed the agricultural society. The shift went from the agricultural society to a more advanced industrial society. This then caused the downfall of the Confederate States of America. "Slaves were known as contraband, or illegal imports to represent the captured slaves, and with the impact of Lincoln, he was able to present the theory of emancipation that took away the view of slaves as property and allowed the states to control the territory within their borders. When the proclamation was first issued, it did not free all slaves. Delaware, Kentucky, Maryland and Missouri had not succeeded from the union. The collapse of the Confederate States of America forced slaves to free away from the plantations.

The emancipation of the rebellion areas was essential to end the ongoing secession that was going on in the United States. Lincoln wanted to "endorse the emancipation on the state level. " The belief of equality towards all individuals is one aspect that Lincoln promoted. At the beginning of the Civil War, Lincoln's main goal was to preserve the union, and in time the theory of emancipation came into effect. Lincoln supported the rights of each individual and the "equality of all humans that demanded and abolishment of slavery. " Releasing slaves all at once was not something that would have been immediately effective, so Lincoln approached the situation in a structured manner. After the Union had won at Antietam, he set fourth a deposition to the Confederate states stating that if the return of the Union was not met, that the remaining slaves would be free.

Kalu, George Klay Kieh Jr., 2022-05-05 Civil Wars in Africa edited by Kelechi A Kalu and George Klay Kieh Jr examines civil conflicts throughout various African countries They argue that civil wars in Africa are by products of the contradictions and crises engendered by the post colonial state

building and nation building projects in Africa With few exceptions the post colonial states in Africa have failed to build societies that invest in the material well being of their citizens protect their political civil and other rights promote accountability transparency the rule of law judicial independence and the holding of free and fair elections and promote ethnic pluralism tolerance mutual respect and peaceful co existence among others In addition the contributors show that the post colonial states in Africa have been ruled by corrupt and autocratic leaders who are obsessed with the maintenance of state power as the pathway to ensuring the private accumulation of wealth through sundry illegal means including bribery extortion and theft of public funds In sum this volume addresses how the failure of the post colonial African state to shepherd the process of building democratic societies based on the centrality of human security has led to the erosion of the legitimacy of the state and its custodians Thus once the contradictions and crises reached their crescendo these post colonial societies than implode into civil wars even at the micro level

Balancing Petroleum Policy Alexander Huurdeman,Anastasiya Rozhkova,2019-05-07 Petroleum discovery in a country presents its policy makers with a challenging and complex task formulating and agreeing on policies that will shape the country s petroleum sector and guide the translation of the newly discovered resources into equitable and sustainable economic and social growth for the nation over the long term Balancing Petroleum Policy provides policy makers and other stakeholders with the basic sector related knowledge they need to embark on this task It introduces a number of topics the petroleum value chain and pivotal factors affecting value creation a consultative process for developing a nation s common vision on key petroleum development objectives design of a legislative and contractual framework petroleum fiscal regimes and their administration prudent fiscal management transparency and governance environmental and social safeguards and economic diversification through industrial linkages Although much of the material is relevant to designing policies for the development of the petroleum sector in general the book gives special focus to developing countries countries in a federal or devolved setting and countries

that have experienced or are still experiencing civil conflict With this focus in mind the book examines three questions ownership management and revenue sharing of petroleum resources that are central to petroleum policy in any federal or devolved state It also offers important perspectives on how to prevent violent conflicts related to such resources Petroleum policies tend to vary significantly from country to country as do the objectives that such policies aim to achieve in the specific context of each particular country Although there is no one size fits all policy and there are no clear cut answers to the many potential policy dilemmas associated with the discovery of petroleum resources this publication may help policy makers find the right balance among the chosen objectives and the right policy choices to achieve these objectives **Statebuilding**

and Intervention David Chandler, 2014-05 This edited book sets out and engages with some of the key policies practices and paradigms of external intervention in the case of state support and reconstruction Many assumptions about statebuilding have been reconsidered in the wake of Iraq and ongoing problems in other states such as Afghanistan Bosnia and Kosovo Rather than being a regional survey or a policy orientated lessons learned book this collection explores the broader framing of policy goals statebuilding practices and the consensus on the need for Western states and international institutions to be engaged in this policy area The volume is divided into three parts the first engages with some of the key policy frameworks and conceptual issues raised by recent statebuilding interventions the second considers core statebuilding practices and the third reconsiders statebuilding paradigms more broadly The essays open up debate and critical discussion in the field at a time when many advocates of extending statebuilding intervention suggest that the complex nature of the problems of non Western states and societies mean that it will inevitably be contradictory and limited in its results **Barriers to Peace in**

Civil War David E. Cunningham, 2014-06-12 Civil wars vary greatly in their duration This book argues that conflicts are longer when they involve more actors who can block agreement veto players and identifies specific problems that arise in multi party bargaining Quantitative analysis of over 200 civil wars since World War II reveals that conflicts with more of these actors last much longer than those with fewer Detailed comparison of negotiations in Rwanda and Burundi demonstrates that multi party negotiations present additional barriers to peace not found in two party conflicts In addition conflicts with more veto players produce more casualties are more likely to involve genocide and are followed by shorter periods of peace Because they present many barriers to peace the international community has a poor track record of resolving multi party conflicts David Cunningham shows that resolution is possible in these wars if peace processes are designed to address the barriers that emerge in multi party conflicts **Interdependence and Foreign Policy** Malcolm

McKinnon, 2013-10-01 Independence and Foreign Policy is the first interpretive study of New Zealand foreign policy to cover the period 1935 the second provides illuminating insights into recent issues in New Zealand foreign policy such as the Vietnam War relations with South Africa and the anti nuclear movement Independence and Foreign Policy has become a standard reference in its field **Understanding Civil War: Africa** Paul Collier, Nicholas Sambanis, 2005 This publication is

part of a two volume set which builds upon previous World Bank research into the causes and characteristics of civil war onset particularly the model developed by Paul Collier and Anke Hoeffler regarding the relationship between violent political conflict and economic development This volume considers the variables identified in the Collier Hoeffler model and applies them to a set of case studies from a range of African countries and then goes on to trace the process of conflict escalation in order to draw conclusions as to why civil war is likely to occur The publication seeks to advance theoretical and empirical knowledge of civil war in order to help further the objective of developing appropriate policy interventions Another volume with case studies from a range of non African countries is available separately ISBN 0821360493 **Somalia: State**

Collapse and the Threat of Terrorism Ken Menkhaus, 2013-11-05 This work explores Somalia's state collapse and the security threats posed by Somalia's prolonged crisis Communities are reduced to lawlessness and the interests of commercial elites have shifted towards rule of law but not a revived central state Terrorists have found Somalia inhospitable using it mainly for short term transshipment *The Oxford Handbook of the Economics of Peace and Conflict* Michelle R.

Garfinkel, Stergios Skaperdas, 2012-02-02 Social scientists and policy makers have long been interested in the causes and consequences of peace and conflict This Handbook brings together contributions from leading scholars who take an economic perspective to study the topic It includes thirty three chapters and is divided into five parts Correlates of Peace and Conflict Consequences and Costs of Conflict On the Mechanics of Conflict Conflict and Peace in Economic Context and Pathways to Peace Taken together they demonstrate not only how the tools of economics can be fruitfully used to advance our understanding of conflict but how explicitly incorporating conflict into economic analysis can add substantively to our understanding of observed economic phenomena Some chapters are largely empirical identifying correlates of war and peace and quantifying many of the costs of conflict Others are more theoretical exploring a variety of mechanisms that lead to war or are more conducive to peace **Understanding Civil War: Europe, Central Asia, and other regions** Paul

Collier, Nicholas Sambanis, 2005-01-01 Annotation VOLUME I Africa VOLUME II Europe Central Asia and Other Regions volumes sold separately This is a superb manuscript and one that will become a standard reference in the field for students of conflict and civil war Robert Bates Eaton Professor of the Science of Government Harvard University The two volumes of Understanding Civil War build upon the World Bank's prior research on conflict and violence particularly on the work of Paul Collier and Anke Hoeffler whose model of civil war onset has sparked much discussion on the relationship between conflict and development in what came to be known as the greed versus grievance debate The authors systematically apply the Collier Hoeffler model to 15 countries in 6 different regions of the world using a comparative case study methodology to revise and expand upon economic models of civil war The book concludes that the greed versus grievance debate should be abandoned for a more complex model that considers greed and grievance as inextricably fused motives for civil war regions of Somalia Conflict in Somalia examines the results of the study and offers recommendations for reconstruction and

development assistance that takes the knowledge on conflict into account

Armed Organizations and Political Elites in Civil Wars Erwin van Veen, 2024-06-03 This book analyses under what conditions and with what developmental effects armed organizations shift their coercive profile during civil wars with a focus on the recent conflicts in Syria and Iraq The work begins with an operationalisation of the term political settlement focusing on how power is organized in fragile and conflict affected countries and then uses this operationalization to analyse the political settlements of contemporary Syria and Iraq including their breakdown and transformation during recent civil wars of 2011 today in Syria and 2014 17 in Iraq It subsequently examines why and how elite factions have used armed organizations in times of conflict This approach links an understanding of the broad evolution of power relations at the national level with the specific effects of the use of armed organizations on such relations It argues for a shift from assigning fixed labels to armed organizations during civil wars to studying their coercive profile in a dynamic fashion i e how armed organizations behave in terms of their use of threats and coercive force The book introduces five profiles of coercive behaviour that demonstrate how the same organization can behave very differently at various points in time One of these the hybrid coercive profile fills a gap in the existing civil war typology of organized armed violence by opening up the possibility of elite factions deliberately combining collaborative and competitive modes of behaviour As an evidence base the book provides in depth analysis of the origins evolution and operations of four armed organizations that have acted under a hybrid coercive profile during the Syrian and Iraqi civil wars the Syrian Kurdish People s Defence Forces the Eagles of the Whirlwind of the Syrian Social Nationalist Party the Iraqi Kurdish Peshmerga and the Badr Organization By connecting the concepts of political settlement and civil war and applying them to specific armed organizations operating in Syria and Iraq the book offers new insights into this nexus This book will be of much interest to students of civil wars conflict studies Middle Eastern Studies and International Relations **2017**

Regional Overview of Food Security and Nutrition in Africa Food and Agriculture Organization of the United Nations, 2018-04-17 This year s edition of the Africa Regional Overview of Food Security and Nutrition reports that after a prolonged decline hunger appears to be on the rise In sub Saharan Africa there were about 224 million undernourished people in sub Saharan Africa in 2016 up from 200 million in 2015 In many countries the worsening situation in 2015 and 2016 can be attributed to adverse climatic conditions often linked to the El Ni o phenomenon resulting in poor harvests and the loss of livestock Conflict sometimes in combination with drought or floods also contributed to severe food insecurity in several countries Lower commodity prices and a difficult global economic environment have furthermore contributed to the worsening food security situation The worrying trend in undernourishment is not yet reflected in the series of indicators referring to nutritional outcomes in the region with the prevalence of stunting and wasting for children under the age of five continuing to decline gradually However progress towards the World Health Assembly global nutrition targets has been generally poor While a relatively large proportion of countries are on track to meeting the target for overweight in children

the rates for adult obesity are soaring in all regions and are especially high in Southern Africa The report also finds that across the board countries have developed and are developing policy frameworks and investment plans that are aligned or efforts are being made to align them with the goals of the Malabo Declaration and SDG 2 Through CAADP policy processes are coherent and this initiative has raised the profile of agriculture and heavily influenced agricultural policy at regional and national levels However the worrying trends in undernourishment underline the need for even greater efforts to achieve the SDG 2 by 2030 The thematic part of the report focuses on the food security and nutrition conflict nexus Conflict is not only an increasingly important cause of food insecurity and malnutrition but food insecurity and malnutrition can also become conflict multipliers Addressing the causes of conflicts and supporting food security and livelihoods can help build resilience to conflict and contribute to sustaining peace
