The term research is well-known to the logical world which plays an important role in finding the new problems and solutions, ideas, techniques, procedures, drugs, etc. Good use of research knowledge especially in writing is imperative to make it beneficial for larger community. In writing of knowledge, proper review of literature is very essential to gather research-problem-related information. Writer should follow the steps throughout collection of data during writing of review article. Review of literature increases clarity, reliability, uniformity and critical evaluation of evidence. This paper attempts to explain the guidelines and steps of review manuscript writing.

Keywords: Guidelines, Review, Characteristics

Introduction

Literature review is the most important aspect of research.¹ A review article is a critical analysis of the literature in a specific area of knowledge through outline, classification, comparison, etc.² A good review article requires briefing, analysing, and synthesizing the study that has been completed on a particular topic. It makes the data more accessible and convenient to publication of research.³ The foremost aim of a review paper is to examine the current status of the given topic as well as talk about the research methodologies and research-problem-related findings. A review text should enclose a complete list of references that are cited in the text.⁴ During writing of review paper, researcher should keep in mind about readers' approaches (i.e., professionals in specific research field, students or beginner research scholars, etc.).^{1,2}

Purpose of a review article

With the help of review article, researcher has to organize,

synthesize and evaluate the literature; in addition, to discover patterns and development in the literature and evaluate the research gaps and propose new research areas.²

Types of Review Article

Review (Overview) Article

There are two basic types of review articles: one is systematic, another is non-systematic. An advanced preparation of specific methodology of review paper is needed in systematic review. Non-systematic review may require a selection of a wide variety of topic-related technical outcome which reflects the expert experiences and interests of the writer.⁴

Critical Review

It analyses the potency as well as fault of a research article after studying the discussed research problem and scientific contents. The review should appropriately explain the

practicing professionals and students **Commonality and Individuality in Academic Discourse** Maurizio Gotti, 2009

This volume explores the relationship between shared disciplinary norms and individual traits in academic speech and writing. Despite the standardising pressure of cultural and language related factors, academic communication remains in many ways a highly personal affair with active participation in a disciplinary community requiring a multidimensional discourse that combines the professional, institutional, social and individual identities of its members. The first section of the volume deals with tensions involving individual, collective values and the analysis of collective vs individual discursive features in academic discourse. The second section comprises longitudinal investigations of the academic output of single scholars so as to highlight the individuality in their choices and the reasons for not conforming with the commonality of conventions shared by their professional community. The third part deals with genres that are meant to impose commonality on the members of an academic community not only in the drafting of specialized texts but also when these are reviewed or evaluated for possible publication.

Economic and Financial Crime, Sustainability and Good Governance Monica Violeta Achim, 2023-08-26 This book addresses the most widespread forms of financial crime today, namely corporate fraud, corruption, tax fraud, the shadow economy, informal entrepreneurship, money laundering, international informal capital flows, cybercrimes and cryptocurrency scams. Given the rapid rise of digitalization, especially due to the COVID-19 pandemic, there has been a huge surge in financial crime, especially in the form of cybercrime, which affects people's financial security. Hence, the aim of this book is to stress the connected nature of financial crime and good governance in order to achieve the most positive sustainable development of society. The book analyzes financial crime in the context of digitalization. On the one hand, digitalization offers clear advantages in terms of reducing classical types of fraud, such as tax evasion, corruption, the shadow economy, etc. On the other hand, digitalization offers new channels for criminals to gain illegal benefits when operating in digital space, e.g. through cybercrime, bank fraud, FinTech fraud, e-commerce fraud, etc. In this context, the term digital shadow economy has recently emerged in the literature as an expression of the types of fraud committed in digital space. In addition, the book explores issues concerning changes in regulations for

various financial crimes around the world statistics and ways to combat digital crimes including punitive preventive and other measures Special attention is paid to cybercrime and cybersecurity issues the goal being to raise readers awareness of these threats
