EVIL PRACTICES STILL EXIST IN NEPAL

By Ramesh Poudel

Dateline

May 3, 2021

Location

Kathmandu: Practicing witchcraft is an evil act punishable by the law of the land. **However** it is widely practiced in rural parts of the country due to superstition, illiteracy, lack of public awareness, poverty and social and economic disparity. Most of the victims of witchcraft are women from humble socio-economic background, single women, differently-abled women, who are subjected to ill-treatment and torture on charges of practicing witchcraft.

Paragraph 1

Use 5-7 transitions. These words are also called linking words.

Furthermore, these categories of people are accused of being witches when their neighbors or family members die or fall ill due to whatsoever reasons. **Disappointingly**, The victims are sometimes smeared with soot, forcefully fed human excreta, beaten up, ostracized from the society or in some cases, beaten up to death. Most of the perpetrators include family members, neighbors and witchdoctors and shaman. Even if the victims of the witchcraft allegation are reported to the police, influential local people try to settle the cases within the villages offering them of financial compensation. **Although**

Paragraph 2

law has defined that accusation of witchcraft is a heinous form of violence, such incidents still take place because of unequal power relations between men and women, who are deprived on property rights and access to law.

According to the statistics provided by the Nepal Police, it registered a total of 61 cases of witchcraft accusation and subsequent torture across the country in the fiscal 2020-21, which is an increase by 79.41 per cent compared to 34 cases of witchcraft accusation in the fiscal 2019-20. Police said 80 perpetrators of witchcraft charge-related violence were recorded in this period.

Paragraph 3

Massive public awareness campaign, along with the involvement of witchdoctors and shaman, can help control the cases of witchcraft.

Moreover, elected representatives at the local levels can also play a vital role in preventing the witchcraft.

Paragraph 4

Overall, since we cannot completely get rid of the witchcraft practice overnight, we need to educate the witchdoctors and shaman so that they can advise the people to visit the health facilities before it is too late.

Paragraph 5

News article is written in **two columns**. This structure (two columns) is usually preferred for **news based writing**. However, it can also be written in **single column**.

Revealing Media Bias in News Articles Felix Hamborg, 2023-02-24 This open access book presents an interdisciplinary approach to reveal biases in English news articles reporting on a given political event. The approach named person oriented framing analysis identifies the coverage's different perspectives on the event by assessing how articles portray the persons involved in the event. In contrast to prior automated approaches, the identified frames are more meaningful and substantially present in person oriented news coverage. The book is structured in seven chapters. Chapter 1 presents a few of the severe problems caused by slanted news coverage and identifies the research gap that motivated the research described in this thesis. Chapter 2 discusses manual analysis concepts and exemplary studies from the social sciences and automated approaches mostly from computer science and computational linguistics to analyze and reveal media bias. This way it identifies the strengths and weaknesses of current approaches for identifying and revealing media bias. Chapter 3 discusses the solution design space to address the identified research gap and introduces person oriented framing analysis (PFA), a new approach to identify substantial frames and to reveal slanted news coverage. Chapters 4 and 5 detail target concept analysis and frame identification, the first and second component of PFA. Chapter 5 also introduces the first large scale dataset and a novel model for target dependent sentiment classification (TSC) in the news domain. Eventually, Chapter 6 introduces Newsalyze, a prototype system to reveal biases to non expert news consumers by using the PFA approach. In the end, Chapter 7 summarizes the thesis and discusses the strengths and weaknesses of the thesis to derive ideas for future research on media bias. This book mainly targets researchers and graduate students from computer science, computational linguistics, political science, and further social sciences who want to get an overview of the relevant state of the art in the other related disciplines and understand and tackle the issue of bias from a more effective interdisciplinary viewpoint. **Corporate**

Reputation and the News Media Craig Carroll, 2010-09-01 This volume examines agenda setting theory as it applies to the news media's influence on corporate reputation. It presents interdisciplinary international and empirical investigations examining the relationship between corporate reputation and the news media throughout the world. Providing coverage of more than twenty five countries, contributors write about their local media and business communities representing developed, emerging, and frontier markets including Argentina, Brazil, Chile, China, Germany, Greece, Japan, Nigeria, Spain, and Turkey, among others. The chapters present primary and secondary research on various geo-political issues, the nature of the news media, the practice of public relations, and the role of public relations agencies in each of the various countries. Each chapter is structured to consider two to three hypotheses in the country under discussion, including the impact of media visibility on organizational prominence, top of mind awareness, and brand name recognition; the impact of media favorability on the public's organizational images of these firms; how media coverage of specific public issues and news topics relates to the associations people form of specific firms. Contributors contextualize their findings in light of the geopolitical environment of

their home countries the nature of their media systems and the relationship between business and the news media within their countries borders Incorporating scholarship from a broad range of disciplines including advertising strategic management business political communication and sociology this volume has much to offer scholars and students examining business and the news media

Resistance Advocacy as News Benjamin Rex LaPoe II, Victoria L. LaPoe, 2018-01-30 Resistance Advocacy as News Digital Black Press Covers the Tea Party examines the Black and mainstream press's digital interpretations of the Tea Party during President Barack Obama's first term. The Tea Party narrative and the white ideologies disseminated by conservative groups was and continues to be an intricate story for journalists to tell. This book tracks coverage of the Tea Party from the modern group's beginning in early February of 2009 until two weeks after the 2012 general presidential election in November. While many mainstream journalists either fail to recognize or ignore all together the racial component that the Tea Party poses to Black solidarity, this book shows that Black reporters working for the Black press absolutely recognize the racial component and provide more thorough discussions than their mainstream counterparts. Historically the Black press has existed to fill holes of misrepresentation in the mainstream press to that end, this book addresses questions surrounding the ongoing necessity of the Black press and whether our society is postracial, combining a quantitative analysis of implicit racial frames with a qualitative analysis of resonant myth and providing empirical evidence that Black people still struggle to have their voices heard in the mainstream press.

Revolution of the Modern Sports Fan Andrew C. Billings, Kenon A. Brown, Melvin Lewis, 2021-08-18 Revolution of the Modern Sports Fan explores the elements of the sports fan that have markedly changed in the past few years. Inherent within these investigations is the role of communication in a multitude of forms mediated relational etc as the prototypical sports fan has most heavily shifted within this domain. From the advent of social media to the rise of fantasy sport to the increased media platforms in which to consume sport, the sports fan has never had more options for consumption and for the rendering of one's opinions. As such, Revolution of the Modern Sports Fan offers an opportunity to advance what we now know about American sports fandom as well as the ability to debunk what scholars thought they knew about sports fandom that has now shifted.

Negotiating Group Identities in Multicultural Germany David Abadi, 2017-10-16 This book scrutinizes the media portrayals of ethnic religious minorities in Germany encompassing the fields of public affairs, media effects, political communication, multiculturalism, populism in the media, and politicized uses of collective identities. It compares the political discourse Bundestag plenary protocols with the mainstream discourse mainstream press in Germany over the sample period of 2009-2015 and explores a multi-layered debate from different perspectives by combining quantitative and qualitative methodologies.
