dimensions of EET programs vary according the particular target group Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship while post secondary education programs emphasize skills related to strategic business planning Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited While programs serving practicing entrepreneurs focus on strengthening entrepreneurs knowledge skills and business practices which while unlikely to transform an enterprise in the near term may accrue benefits to entrepreneurs over time The study also offers implications for policy and program implementation emphasizing the importance of clarity about target groups and desired outcomes when making program choices and sound understanding of extent to which publicly supported programs offer a broader public good and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives
