Full-Stack Flask and React Olatunde Adedeji, 2023-10-06 Get to grips with UI interaction data modeling API development and documentation while building modern web apps for cloud deployment Key Features Combine Flask s pagination techniques with React s dynamic rendering for an enhanced user

experience Implement robust API development within Flask applications by performing CRUD operations Improve Flask app scalability with blueprints using a modular development approach Purchase of the print or Kindle book includes a free PDF eBook Book Description Developing an interactive efficient and fast enterprise web application requires both the right approach and tooling If you are a web developer looking for a way to tap the power of React s reusable UI components and the simplicity of Flask for backend development to develop production ready scalable web apps in Python then this book is for you Starting with an introduction to React a JavaScript library for building highly interactive and reusable user interfaces you ll progress to data modeling for the web using SQLAlchemy and PostgreSQL and then get to grips with Restful API development This book will aid you in identifying your app users and managing access to your web application You ll also explore modular architectural design for Flask based web applications and master error handling techniques Before you deploy your web app on AWS this book will show you how to integrate unit testing best practices to ensure code reliability and functionality making your apps not only efficient and fast but also robust and dependable By the end of this book you ll have acquired deep knowledge of the Flask and React technology stacks which will help you undertake web application development with confidence What you will learn Explore the fundamentals of React for building user interfaces Understand how to use JSX to render React components Handle data and integrate third party libraries and APIs into React applications Secure your Flask application with user authentication and authorization Discover how to use Flask RESTful API to build backend services with React frontend Build modular and scalable Flask applications using blueprints Who this book is for This book is for Python web developers who want to build full stack applications as well as for frontend developers seeking to expand their skillset by employing Flask as a backend development tool You ll gain proficiency in both frontend and backend skills and acquire the knowledge necessary to deploy solutions in the cloud using AWS Prior knowledge of basic HTML CSS JavaScript and Python programming will help you to get the most out of this book Information Retrieval Evaluation Donna Harman, 2022-05-31 Evaluation has always played a major role in information retrieval with the early pioneers such as Cyril Cleverdon and Gerard Salton laying the foundations for most of the evaluation methodologies in use today The retrieval community has been extremely fortunate to have such a well grounded evaluation paradigm during a period when most of the human language technologies were just developing This lecture has the goal of explaining where these evaluation methodologies came from and how they have continued to adapt to the vastly changed environment in the search engine world today The lecture starts with a discussion of the early evaluation of information retrieval systems starting with the Cranfield testing in the early 1960s continuing with the Lancaster user study for MEDLARS and presenting the various test collection investigations by the SMART project and by groups in Britain The emphasis in this chapter is on the how and the why of the various methodologies developed The second chapter covers the more recent batch evaluations examining the methodologies used in the various open evaluation campaigns such as TREC NTCIR emphasis on Asian languages CLEF

emphasis on European languages INEX emphasis on semi structured data etc Here again the focus is on the how and why and in particular on the evolving of the older evaluation methodologies to handle new information access techniques This includes how the test collection techniques were modified and how the metrics were changed to better reflect operational environments The final chapters look at evaluation issues in user studies the interactive part of information retrieval including a look at the search log studies mainly done by the commercial search engines Here the goal is to show via case studies how the high level issues of experimental design affect the final evaluations Table of Contents Introduction and Early History Batch Evaluation Since 1992 Interactive Evaluation Conclusion
