New Age Technology in Supply Chain Management Mohammed Majeed, 2025-05-09 This new book details the impact of IT and digital

transformation tools on supply chain management and how these smart tools can be the keys to the success of organizations. The technologies covered include big data, robotics, artificial intelligence, machine learning, blockchain, and the Internet of Things. The book first provides an introduction to IT and supply chain management and explains how digital tools can positively affect procurement in different types of industries and markets, covering their importance, methods, and requirements for efficient and effective implementation in workplaces and businesses. The book covers topics such as the application of artificial intelligence in SCM in the hospitality and hotel sector as well as in the oil and gas industry. The volume presents a global perspective on procurement and supply chain management using detailed real-world examples to bring the subject matter to life. It will be a valuable resource for industry executives and researchers as well as for faculty and students studying this area.

Global Clinical Legal Education Jeff Giddings, 2025-01-28. This book explores the distinctive nature of clinical legal education in a range of global contexts. The emergence of law school-based clinical legal education has been recognised as a major innovation in modern legal education. At its best, it integrates the academic rigour of university-based learning with the practical, ethical, and social justice insights that come from structured work with clients. This book examines what makes clinic different from other aspects of legal education and how it differs from experiential learning in other disciplines, particularly in its emphasis on social justice. It provides an analysis of various models that support student learning in community settings. From 66 contributors across the globe, learning goals, teaching methods, focus areas, forms of student involvement, engagement with lawyers, and the challenges faced are all identified as important in giving clinical legal education its local flavour. Exploring the role of technology in clinic and the significant growth in technology-based clinics, the book reviews the ways in which clinics harness technology to serve diverse client communities and extend the global reach of clinical legal education, particularly in light of the ongoing COVID-19 pandemic. This book will be of particular interest to researchers in the fields of clinical legal education and the use of emerging technologies in legal education.
