Navy After Action Report:

After Action Report, 1 August 1944-9 May 1945, Volume II United States. Army. Army, 3rd, 1945 **David McCampbell** David Lee Russell, 2019-06-12 David McCampbell was the leader of the most successful naval air group in combat in World War II. An unequalled naval aviator, McCampbell shot down a total of 34 Japanese aircraft across numerous battles. Eventually awarded the Medal of Honor, he first served in the Atlantic as a carrier Landing Safety Officer, then as an air group leader in the Pacific theater. McCampbell's 31-year career reveals an astounding diversity of leadership roles and service assignments. McCampbell commanded ships, training centers, and aircraft squadrons and held a variety of Navy and Defense Department senior staff positions. Naval Aviation United States. General Accounting Office, 1993 *Naval Firepower* Norman Friedman, 2013-08-20 An in-depth history of naval battleship firepower from before World War I to the end of World War II by America's leading naval analyst. For more than half a century, the big gun was the arbiter of naval power, but it was useless if it could not hit the target fast and hard enough to prevent the enemy from doing the same. Because the naval gun platform was itself in motion, finding a firing solution was a significant problem exacerbated when gun sizes increased, fighting ranges lengthened, and seemingly minor issues like wind velocity had to be considered. To speed up the process and eliminate human error, navies sought a reliable mechanical calculation. This heavily illustrated book outlines, for the first time in layman's terms, the complex subject of fire control as it dominated battleship and cruiser design from before World War I to the end of the dreadnought era. Covering the directors, range finders, and electro-mechanical computers invented to solve the problems, author Norman Friedman explains not only how the technology shaped and was shaped by the tactics involved, but also analyzes their effectiveness in battle. His examination of the controversy surrounding Jutland and the relative merits of competing fire control systems draws surprising conclusions. He also reassesses many other major gun actions, such as the battles between the Royal Navy and the Bismarck and the U.S. Navy actions in the Solomons and at Surigao Strait. All major navies are covered, and the story concludes at the end of World War II with the impact of radar.

Bureau of Naval Personnel Information Bulletin, 1944 *War in the Shallows* John Darrell Sherwood, 2015 War in the Shallows, published in 2015 by the Naval History and Heritage Command, is the authoritative account of the U.S. Navy's hard-fought battle along Vietnam's rivers and coastline from 1965 to 1968. At the height of the U.S. Navy's involvement in the Vietnam War, the Navy's coastal and riverine forces included more than 30,000 sailors and over 350 patrol vessels ranging in size from riverboats to destroyers. These forces developed the most extensive maritime blockade in modern naval history and fought pitched battles against Viet Cong units in the Mekong Delta and elsewhere. War in the Shallows explores the operations of the Navy's three inshore task forces from 1965 to 1968. It also delves into other themes such as basing, technology, tactics, and command and control. Finally, using oral history interviews, it reconstructs deckplate life in South Vietnam, focusing in particular on combat waged by ordinary sailors. Vietnam was the bloodiest war in recent naval history.

and War in the Shallows strives above all else to provide insight into the men who fought it and honor their service and sacrifice Illustrated throughout with photographs and maps Author John Darrell Sherwood has served as a historian with the Naval History and Heritage Command NHHC since 1997 Provided by publisher A Failure of Initiative: Final Report of the Select Bipartisan Committee To Investigate the Preparation for and Response to Hurricane Katrina, February 15, 2006 ,
