## Navy Intake Result:

Brassey's Naval Annual Earl Thomas Allnutt Brassey,1950      *Soviet Women on the Frontline in the Second World War*  
R. Markwick,E. Charon Cardona,Euridice Charon Cardona,2012-06-26 This is the first comprehensive study in English of  
Soviet women who fought against the genocidal misogynist Nazi enemy on the Eastern Front during the Second World War  
Drawing on a vast array of original archival memoir and published sources this book captures the everyday experiences of  
Soviet women fighting living and dying on the front      *BuDocks Technical Digest, Construction, Maintenance & Operation*  
*of the Navy's Shore Establishments* ,1949      **Morbidity and Mortality Weekly Report** ,2006-11      **Mineral**  
**Requirements for Military Personnel** Institute of Medicine,Food and Nutrition Board,Committee on Military Nutrition  
Research,Committee on Mineral Requirements for Cognitive and Physical Performance of Military Personnel,2006-07-21 The  
U S Army Health Risk Appraisal group surveyed 400 000 active duty U S Army personnel in the late 1990s to determine  
whether or not those personnel met the dietary objectives of Healthy People 2000 HP2000 a national agenda for health  
promotion and disease prevention As reported by Yore et al 2000 Army personnel generally did not meet the HP2000 goals  
for nutrition even though significant progress had been made during 1991 1998 Although the specific aspects of diet that  
would be relevant to this Committee on Mineral Requirements for Cognitive and Physical Performance of Military Personnel  
are lacking the findings from this survey suggest that there are dietary problems in the military population The potential for  
adverse effects of marginal mineral deficiencies among soldiers engaged in training or military operations and the prospect  
of improving military performance through mineral intakes have spurred the military s interest in this area of nutrition  
Mineral Requirements for Military Personnel provides background information on the current knowledge regarding soldiers  
eating behaviors as well as on the physical and mental stress caused by military garrison training or operations This report  
also offers facts on the mineral content of rations and its intake by military personnel and addresses the potential effects of  
nutrient deficiencies due to inadequate intake or higher requirements during military operations Mineral Requirements for  
Military Personnel provides information and recommendations on the development and uses of MDRIs and a description of  
strategies to increase intake of specific minerals whether via usual foods fortification or supplementation This report features  
a description of the metabolism and needs for selected minerals by military personnel under garrison training  
recommendations on mineral intake levels and an assessment of mineral level adequacy in operational rations This report  
also includes a prioritization of the research needed to answer information gaps and details of study designs required to gain  
such information      **Board of Contract Appeals Decisions** United States. Armed Services Board of Contract Appeals,1985
