

NBT Mathematics test (MAT): EXAMPLES OF TYPICAL QUESTIONS

Examples are often helpful, although 'teaching to the test' limits real engagement with the mathematical topics that are being assessed. The NBTP does not make any NBT papers available for the public domain. In one sense this levels the playing fields: where for example past NSC papers are available, not all learners have access to them, or are drilled in working through them. The provision of a limited number of MAT examples on the website is also problematic: it simply isn't possible to provide examples of all the sub-divisions of the mathematics topics, at all cognitive levels.

In the interests of answering the many questions directed to the NBTP call centre asking for some idea of what could be expected, a few sample questions are given below, to give a sense of the types of questions that could be expected.

Questions in the section *Functions and their Graphs* will determine whether a test writer understands the properties of parabolas. Questions 1 and 2 are examples.

1. The function f defined by $y = f(x) = -x^2 + 6x - 5$ has
- (A) A minimum y value and a negative y -intercept.
 - (B) A maximum y value and a positive y -intercept.
 - (C) A minimum y value and a positive y -intercept.
 - (D) A maximum y value and a negative y -intercept.

Under the heading *Algebraic Processes* one of the topics listed is *Algebraic Manipulation*. Question 2 is an example of a question where the answer cannot be deduced by substituting into the given options to rule out those that are incorrect.

2. The sum of the roots of the equation
 $-x^2 + 6x - 5 = 0$
is (A) -5 (B) -4 (C) 3 (D) 6

Another topic listed under the heading *Algebraic Processes* is *Number Sense*. The following question depends on *Number Sense* (the bigger a number, the bigger its square root) as well as the concepts tested in the first two questions above.

3.

The expression $\sqrt{-x^2 + 6x - 5}$ has a

- | | |
|------------------------|------------------------|
| (A) maximum value of 2 | (B) minimum value of 2 |
| (C) maximum value of 3 | (D) minimum value of 3 |

Question 4 is an example of the category *Transformations* and related concepts.
