Make some more Collatz sequences like those above, starting with your favourite whole numbers. Do you always reach 1?

Do you believe the conjecture of Collatz that all such sequences will eventually reach 1? Why or why not?

Answer:

Collatz Sequence

Starting with 10: $10 \rightarrow 5 \rightarrow 16 \rightarrow 8 \rightarrow 4 \rightarrow 2 \rightarrow 1$

Starting with 15: $15 \rightarrow 46 \rightarrow 23 \rightarrow 70 \rightarrow 35 \rightarrow 106 \rightarrow 53 \rightarrow 160 \rightarrow 80 \rightarrow 40 \rightarrow 20 \rightarrow 10 \rightarrow 5 \rightarrow 16 \rightarrow 8 \rightarrow 4 \rightarrow 2 \rightarrow 1$

Starting with 19: $19 \rightarrow 58 \rightarrow 29 \rightarrow 88 \rightarrow 44 \rightarrow 22 \rightarrow 11 \rightarrow 34 \rightarrow 17 \rightarrow 52 \rightarrow 26 \rightarrow 13 \rightarrow 40 \rightarrow 20 \rightarrow 10 \rightarrow 5 \rightarrow 16 \rightarrow 8 \rightarrow 4 \rightarrow 2 \rightarrow 1$

Yes, in the above examples and many others, the sequence always eventually reaches 1. This pattern has been observed for a vast range of starting numbers, though it has not been formally proven for all possible numbers.

I believe the Collatz conjecture could be true, based on empirical evidence. Every tested sequence eventually reaches 1, even for very large numbers. This makes it seem likely that the conjecture holds for all numbers.

Reasoning

- Empirical support: No counterexample has been found despite extensive testing, supporting the idea that all sequences eventually reach 1.
- Intuition: The repetitive nature of the rules (halving even numbers and making odd numbers smaller after multiplying and adding) suggests that most sequences get reduced quickly.

However, since the problem is still unsolved, there is always the possibility of an exception for some very large, unknown number.

Page 69

Figure it Out

We shall do some simple estimates. It is a fun exercise, and you may find it amusing to know the various numbers around us. Remember, we are not interested in the exact numbers for the following questions. Share your methods of estimation with the class.

1. Steps you would take to walk:

- a. From the place you are sitting to the classroom door
- b. Across the school ground from start to end
- c. From your classroom door to the school gate
- d. From your school to your home
