- A) Allow the newborn infant to signal a need
- B) Anticipate all of the needs of the newborn infant

A mother of a 3-year-old tells a clinic nurse that the child is rebelling constantly and having temper tantrums. The nurse most appropriately tells the mother to:

- A) Punish the child every time the child says "no", to change the behavior
- B) Allow the behavior because this is normal at this age period
- C) Set limits on the child's behavior
- D) Ignore the child when this behavior occurs

Answer- C) Set limits on the child's behavior- According to Erikson, the child focuses on independence between ages 1 and 3 years. Gaining independence often means that the child has to rebel against the parents' wishes. Saying things like "no" or "mine" and having temper tantrums are common during this period of development. Being consistent and setting limits on the child's behavior are the necessary elements.
