

NDT Test Station Repeatable Manual Inspection

The Modal Shop's NDT Test Station, Model NDT-TS2 Resonant Inspection System is an ideal Resonant Acoustic Method testing system when repeatable manual inspections are required. The innovative Test Station provides a means of repeatable manual inspections by allowing precise control of part positioning with an adjustable table ranging up to 6.25 inches (158.75 mm) in height. Photo eye sensors trigger the integrated industrial impactor when a part is in position.

Once impacted, the objective part inspection requires no human interpretation. The system includes a laptop PC, running NDT-RAM software which acquires data for analysis from each part and then delivers a simple Pass or Fail result. The included light tower provides a clear, visual indication of a part's test status after impact for the operator to sort the part accordingly.

The NDT-TS2 includes the following components, preassembled in a turnkey system:

- Light tower for visual part status indication
- Photo eye sensors for automated impact trigger
- Aluminum frame with adjustable table
- Laptop PC mounted on adjustable swing arm
- PLC control
- Industrial impactor and foot trigger switch
- Microphone
- LanSharc™ Smart Digital Controller
- NDT-RAM™ software

As with all Resonant Inspection systems from The Modal Shop, testing ensures fast, objective sorting of parts. Quality testing has never been easier.
