The Management Report

1. Introduction

This report follows a health and safety inspection of the company offices and construction site at Banzar Onshore Project, RLIC, Qatar.

The inspection has been conducted on 26th August 2011 to highlight good practices and areas of concern requiring urgent action. The observations are listed in Appendix 1, attached to this report.

2. Summary

The current project health and safety condition is revealing an excellent compliance level and is really commendable. There are several excellent practices being implemented across the project [e.g. O&I intervention, JSO card, permit to work [PTW], safe working method statement [SWMS], job safety analysis [JSA], last minute risk assessment [LMRA], total safety task instruction [TSTI], regular health and safety audit and inspection, etc.] that leading the project health and safety condition into its best shape.

However, several observations had been noted requiring an action for improvement; risk assessment for subcontract activities [CDM 2007.], protruding rebar/nails [CDM 2007 and Workplace Regs.], insufficient number of toilets [Workplace Regs.], heat stress work/rest cycle [HSW Act & Workplace Regs.].

3. Issue Requiring Attention

4. Conclusion

The workshops were found to be clean, well maintained and well lit. The trainees clearly enjoyed working there. There were, however, a number of issues which need to be addressed urgently to avoid possible legal action or compensation claims following injuries. All these problems, other than the heating system, should be rectifiable within a total cost range of £ 1000–£1500.

Finally, the Health and Safety policy should be revisited and prominently displayed in both workshops.
