

## EUGENICS ON THE RISE: A REPORT FROM SINGAPORE

C. K. Chan

Singapore's National Day in August 1983 was the occasion for a remarkably explicit statement by the Prime Minister, Lee Kuan Yew, of his firm convictions on intelligence, heredity, and their implications for social policy in Singapore (1). For those of us who might have thought that vulgar eugenics had fallen into irredeemable disrepute in the hands of Nazi Germany's race hygienists, the recent developments in Singapore are a startling reminder that eugenic doctrines, in their more benign forms, retain much of their plausibility for large sectors of public opinion. Indeed, the appeal seems not to be confined to politically conservative societies, but is apparent even in the People's Republic of China, where there have been recent calls for "positive eugenics . . . to accelerate the birth of individuals possessing outstanding physical and intellectual qualities" (2).

In his National Day speech that year, Premier Lee returned to a favorite theme, i.e., the importance of the quality of human material that has sustained Singapore's impressive economic growth.<sup>1</sup> Coupled with his firm belief in the innate (indeed, hereditary) character of those qualities making for this success, eugenic considerations had been for quite a while an important factor in major areas of social policy in Singapore. In previous statements, public as well as private, Lee had been utterly explicit about his uncompromising elitism and his conviction that the fate of Singapore rested with an elite group of "no more than 5 per cent" who were "more than ordinarily endowed physically and mentally" (4, p. 13). This was not merely ideological cant, but was consistently carried over into social policy and most vividly typified by an elaborate tracking (streaming) system in the republic's educational set-up. For Lee, the social engineering objectives were clear (4):

We must expend our limited and slender resources [on these naturally superior individuals] in order that they will provide that yeast, that ferment, that catalyst in our society which alone will ensure that Singapore shall maintain its pre-eminent place in the societies that exist in South East Asia. . . .

<sup>1</sup> Singapore, together with South Korea, Taiwan, and Hong Kong have been acclaimed as the most successful among the Newly Industrializing Countries, the four "little dragons" whose rapid and sustained growth over the last decade and a half have propelled them almost into the ranks of the industrialized countries. For a discussion of the Singapore case see (3).

**Report of the ... Annual Meeting ,1911** **Controlling the Dangerous Classes** Randall G. Sheldon,Pavel V. Vasiliev,2017-12-19 Throughout history the powerful have created laws developed agencies to enforce those laws and established institutions to punish lawbreakers Maintaining the social order to their advantage resulted in the systematic repression of disadvantaged groups the dangerous classes The third edition retains a historical approach to exploring patterns of social control and through current examples demonstrates how those strategies continue

today The authors trace the roots of race class and gender bias in how laws are written interpreted and applied The management of dangerous classes is not a recent phenomenon there is a long history of keeping those who derive the least advantage from the status quo and therefore pose the greatest threat under control There was and is one system of justice for the privileged and a very different system for the less privileged The criminal justice system from the law to daily operations of the police courts and corrections generally comes down hardest on those with the least amount of power and influence and is the most lenient with those with the most power and influence The book raises critical questions What is a crime What is law Whose interests are served by the law and the criminal justice system What patterns are repeated generation after generation How does the criminal justice system relate to larger issues such as social inequality social class race and gender Contemplation of these topics contributes to informed public dialogue and careful deliberation about the present state and the future of criminal justice

**Long Island and the Legacy of Eugenics** Mark A. Torres,2025-01-21 A Dark History Revealed In the early twentieth century eugenics was at the forefront of scientific discourse in the quest to understand human genetics On Long Island and throughout the nation eugenicists were granted unfettered access to conduct experiments on prisoners psychiatric patients Coney Island circus performers and more all in an effort to legitimize a false science The origins of the eugenics movement can be found within the Eugenics Record Office an otherwise nondescript two and a half story administrative building at Cold Spring Harbor New York under the direction of Charles Benedict Davenport from 1910 to 1939 The work conducted there directly led to the forced sterilization of thousands of American citizens and the passage of anti immigration laws and sparked a deadly global movement Author Mark Torres explores the local characters influences landmarks and ghastly consequences that emanated from this small Long Island facility for decades and spread throughout the world

*Communicating Race, Ethnicity, and Identity in Technical Communication* Miriam Williams,Octavio Pimentel,2016-12-05 The purpose of this book is to move our field s discussion beyond issues of diversity in the practice of technical communication which is certainly important to include discussions of how race and ethnicity inform the production and distribution of technical communication in the United States Equally important this book is an attempt to uncover those communicative practices used to adversely affect historically marginalized groups and identify new practices that can be used to encourage cultural competence within institutions and communities This book like our field is an interdisciplinary effort While all authors have taught or practiced technical communication their backgrounds include studies in technical

communication rhetoric and composition creative writing and higher education For the sake of clarity the book is organized into five sections historical representations of race and ethnicity in health and science communication social justice and activism in technical communication considerations of race and ethnicity in social media users right to their own language and communicating identity across borders cultures and disciplines      **Toward a Living Architecture?** Christina Cogdell, 2019-01-01 A bold and unprecedented look at a cutting edge movement in architecture *Toward a Living Architecture* is the first book length critique of the emerging field of generative architecture and its nexus with computation biology and complexity Starting from the assertion that we should take generative architects rhetoric of biology and sustainability seriously Christina Cogdell examines their claims from the standpoints of the sciences they draw on complex systems theory evolutionary theory genetics and epigenetics and synthetic biology She reveals significant disconnects while also pointing to approaches and projects with significant potential for further development Arguing that architectural design today often only masquerades as sustainable Cogdell demonstrates how the language of some cutting edge practitioners and educators can mislead students and clients into thinking they are getting something biological when they are not In a narrative that moves from the computational toward the biological and from current practice to visionary futures Cogdell uses life cycle analysis as a baseline for parsing the material energetic and pollution differences between different digital and biological design and construction approaches Contrary to green tech sustainability advocates she questions whether quartzite based silicon technologies and their reliance on rare earth metals as currently designed are sustainable for much longer challenging common projections of a computationally designed and manufactured future Moreover in critiquing contemporary architecture and science from a historical vantage point she reveals the similarities between eugenic design of the 1930s and the aims of some generative architects and engineering synthetic biologists today Each chapter addresses a current architectural school or program while also exploring a distinct aspect of the corresponding scientific language theory or practice No other book critiques generative architecture by evaluating its scientific rhetoric and disjunction from actual scientific theory and practice Based on the author's years of field research in architecture studios and biological labs this rare field building book does no less than definitively unsparingly explain the role of the natural sciences within contemporary architecture      *The SAGE Encyclopedia of Surveillance, Security, and Privacy* Bruce A. Arrigo, 2016-06-15 In all levels of social structure from the personal to the political to the economic to the judicial *The SAGE Encyclopedia of Surveillance Security and Privacy* uncovers and explains how surveillance has come to be an integral part of how our contemporary society operates worldwide      *Child Victims* Jane Morgan, Lucia Zedner, 1992 *Child Victims* explores the range and extent of crimes committed against children and assesses their impact The testimony of over two hundred children gives voice for the first time to their experiences their views and their needs It examines how children attain the status of victims in the criminal justice system Drawing on recent research findings the authors examine each stage of the legal

process that a child encounters from the initial reporting of the offence through police investigation to the trial itself They contrast the specialist response to victims of child sexual abuse with the experience of children who are victims of other crimes thrust into an adult system which takes little account of their needs Child Victims concludes by examining the role of support services and agencies dealing with child victims and makes a number of key recommendations for future policy

**Calling All Angels** Stephen Requa,2016-09-15 Calling All Angels is a solution to the suppressed history of the 20th and 21st centuries it reveals the fundamental realities underlying the events starting with the 1905 murder of Jane Stanford and its related subsequent 1913 passage of the Federal Reserve Act that established that elite privately owned bank the Federal Reserve These discussions with the late Dr Robert W P Cutler one of Stanford University s most respected neurologists and author of The Mysterious Death of Jane Stanford explore the realities of the Jane Stanford murder as organized by John D Rockefeller Theodore Roosevelt and Stanford s then president David Starr Jordan The book asserts that they organized the murder poisoning of Jane Stanford so as to create their first money machine used for large bribes and political pay offs disguised covertly as donations It further suggests that some of the most horrendous events in U S history such as the JFK assassination and the destruction of the World Trade Centers were only possible because the most implacable of the world s highest level criminals had their own private money machine the Federal Reserve Bank The book contains more than 300 communications e mails from Dr Cutler during the time he was researching his historic book as well as his candid thoughts and conclusions far too controversial and explosive to be published

*Nazi Eugenics* Melvyn Conroy,2017-09-19 Conceived as the answer to all of mankind s seemingly insoluble health and social problems and promoted as a substitute for orthodox religious beliefs the pseudoscience of eugenics recruited disciples in many countries during the latter years of the nineteenth and early years of the twentieth centuries Nowhere was this doctrine more enthusiastically endorsed than in Germany where the application of eugenic theory received its most fervent support A program born of what were often contradictory opinions began under Nazi rule with the compulsory sterilization of thousands of Germany s citizens before morphing into the mass murder of the most vulnerable of the state s own population under the guise of so called euthanasia before ultimately escalating into a continent wide policy of extermination of those who did not fit the Nazi eugenic template The progress of this inexorable descent into barbarity was marked by successive stages of development From the practical application of euthanasia through the organization dedicated to it later on called Aktion T4 and the killing centers that this institution spawned to the centrality of Aktion T4 to Aktion Reinhardt and the Holocaust important elements of the historical record can be seen to emerge How did it happen What impact has it had on contemporary society And what of the character and fate of the individuals involved in the gestation and implementation of this murderously inhumane quasi religion These deceptively simple questions require complex and often disturbing answers as shown by Melvyn Conroy in this important work
