It is a common mistake to think that the only way to improve the quality of a product is to increase the number of people working on it. In fact, the opposite is true. The more people you have working on a project, the more likely you are to have communication problems, which can lead to a decrease in quality. This is because as the number of people increases, the complexity of the communication system also increases. This can lead to a breakdown in communication, which can result in a decrease in the quality of the product. Therefore, it is important to carefully manage the number of people working on a project to ensure that communication remains effective and that the quality of the product is maintained.
