Space Robotics: Dynamics and Control Yangsheng Xu,Takeo Kanade,1992-11-30 Robotic technology offers two potential benefits for future space exploration One benefit is minimizing the risk that astronauts face The other benefit is increasing their productivity Realizing the benefits of robotic technology in space will require solving several problems which are unique and now becoming active research topics One of the most important research areas is dynamics control motion and planning for space robots by considering the dynamic interaction between the robot and the base space station space shuttle or satellite Any inefficiency in the planning and control can considerably risk by success of the space mission *Space Robotics Dynamics and Control* presents a collection of papers concerning fundamental problems in dynamics and control of space robots focussing on issues relevant to dynamic base robot interaction The authors are all pioneers in theoretical analysis and experimental systems development of space robot technology The chapters are organized within three problem areas dynamics problems nonholonomic nature problems and control problems This collection provides a solid reference for researchers in robotics mechanics control and astronautical science

Space Robotics Xiu Tian Yan,Gianfranco Visentin,2024-12-11 This book presents the latest research findings from leading space robotic researchers around the world together with contributions from leading space systems industrialists on the practical aspects of research and development in space robotics The book also considers future challenges and trends to provide a look ahead for space robotics The European Commission set up the Space Robotic Technologies Strategic Research Cluster SRC in its flagship funding programme Horizon 2020 with the goal of enabling major advances in strategic key points of Space Robotics Technologies in order to improve European competitiveness Space robotics have advanced rapidly in recent years as reflected in recent successful space exploration missions like NASA s successful landing and operation of the Curiosity rover on Mars and the European Space Agency s equally successful landing of its Philae probe on comet 67P Churyumov Gerasimenko These advances have inspired many young graduates and undergraduates to study space robotics
