## I. Background

The Desert Shield/Desert Storm Museum commemorates those who served in the Persian Gulf on behalf of our country during Operation Desert Shield/Desert Storm. The museum houses many artifacts of the war and gifts of appreciation from the Saudi Arabian and Kuwaiti Governments. Upgraded security measures are required for the museum.

## II. System Requirements

- Six rooms within the museum, each 20' x 20', permanently house the museum's displays. Each room requires 24-hours-a-day/seven-days-a-week video surveillance. An archived record of surveillance must be maintained of the video for the previous four weeks. The video system must be light-compensated for normal extremes of indoor lighting. The control and monitoring room is 8' x 8'.
- A walk-through metal detection system will be installed at the main entrance to the museum. The system must have indicators for power and alarm and a 12-digit key pad, which is hermetically sealed to resist dust and moisture. A humidity tolerance of 95% non-condensing is required, as is an operating temperature of 10°C to 55°C. There must be constant monitoring of each electronic system and an announcement of any major failure. The structure must conform to the structure around it. The detector must be weatherized.
- An uninterruptable power supply or other electrical backup system will be required to support the video and metal detection systems at full capacity for at least two hours.
