

Types of data				Types of data (cont)			Stages of research		
Primary data	Data collected by the researcher themselves i.e. experiments / surveys / observations.	- Relevant information - Can Control methodology	- Time Consuming - Can be costly dependant on the methods used	Qualit: Type of data that is focused around opinion, feelings and why something is happening. Complex data and harder to analyse. Subjective Data.	- Detailed information that explores reasonings- Based on human experience which gives better validity	- Longer process to analyse the data as it all varies due to subjective nature if not careful- researcher can have a negative impact on the results - behaviour	1. Choice of topic	Deciding whether the research will focus on • social problems • sociological problems	They need to know what they're studying
Secondary data	Data collected by other people & organisations	- Already gathered so quicker - Usually cheaper to access	- Information may be old and inaccurate - Questionable whether it can be applied				2. Aim	Considering the main research goal in their study	It is important to have a research goal
Quantitative data	Numerical, statistical information that is objective. Answers factual questions instead of giving reasonings.	- Best for representativeness and generalisability - Broader study - greater number of subjects	- Harder to analyse and give reasonings - Can't explore why	Positivism vs Interpretivism POSITIVISM - Theory approach based on natural and factual causes - Idea surrounds objectivity and positivists want statistical, quantitative data that reveals the truth. Preferred research methods: Quantitative, Official Statistics, Social Surveys, / Unstructured Interviews / Questionnaires			INTERPRETIVISM - Approach which tries to see explanations from subjects perspective. They want Verstehen (Meaning) and qualitative data with reasons as to why something happened. Preferred research methods: Qualitative, Personal Documents, Participant Observation, Unstructured Interviews		
							3. Operationalise research values	Breaking down the hypothesis or aim into concrete values that can be measured	Precise measurement of social phenomena cannot occur without it and it allows others to replicate your research
							4. Choose target population	Choosing people with the characteristics you want to research	It is important to have a defined research population
							Stages of research (cont) 5. Choose sampling method		
							Choosing between random and non-random sampling	The sampling method is crucial to ensure the sample is generalisable
