There is a old saying that guns dont kill people, people kill people. This is a known saying that comes out all the time when this conversation pops up. The media portrays gun control in a positive light, they believe that this is something that would work: believe that gun control will never work and giving people guns to protect themselves and taking guns from people the public judges or deems unfit is a terrible idea.

It is unsafe, and also endangering people's lives and is unfair, plus it is oing against the second amendment which many have died to protect. The Article ("We Need More Gun control, whether You Know It or Not") is an pro-gun article that explains how most americans think you need a background check and go through all these test to be able to buy a gun, "but such laws don't exist". First thing that concerns me with this article is the how he acquired the stats and comments he obtained.

Most of them are only from a small group consensus and was not open up to the public to thus meaning that it is only one sided and not taking an opinion from thers sides ot this topic. The second bit ot information that was about this article was that he has no ethos and have no real credited sources of his information. An picture I found on the web from ("accessories. com") was an perfect example for gun rights. This pictures describes that George Bush is saying "Free People Ought To Be Armed".

This picture basically saying that George Bush a person that fought for the rights of people is saying that they should be dble to keep their guns. I Agree with statement the government now is trying to take away guns from people and give uns to untrained people who would hurt themselves and kill someone on accident "like a kid with a gun". On the website ("Twitter. com") there is an anti-gun control picture. This picture is saying that a man named Joe Salazar is being claimed an idiot because he states that college women should not have guns because women fearing rape may "pop a round at someone".

I agree with this statement. Having untrained women and some men carrying weapons will endanger people around them, the said so person, and his/her self. This is a terrible compromise to having people protected and putting in pro gun ontrol laws which end up benefiting no one in the end of it all. "I guess Dy nature, I'm a oestructive one Ana truth De told, the saTety was never on. So warning bells should have rung when I was trained wrong. For you knew I was the trigger happy and sought.

I'm thinking 'goodbye' would have been for the best instead. But now I found you dead, with my bullets in your chest. " A tragedy like this could be avoided if people where to realize that gun control is a terrible idea for the peoples safety and needs to be thinked over. Yes, there will be death cause by insane eople just unloading rounds into pe

Gun Control in the United States Gregg Lee Carter,2017-01-23 This up to date second edition work will stimulate and clarify readers thinking on the key issues surrounding guns in the United States especially on the debate over gun control

Most public debate and discussion about guns in U S society is rarely guided by research not surprising as most individuals have a personal opinion on this highly inflammatory topic based on their upbringing or personal experiences Additionally most research about gun use in America is confusing and contradictory making it difficult for citizens to gain much from their attempts to investigate the topic objectively This book offers concise understandable coverage of all aspects of the issue including incidence of gun violence gun control gun rights government regulation legislation and court decisions gun organizations for gun control and for gun rights gun enthusiast subcultures for example hunters target shooters and collectors and U S attitudes toward guns Many of the covered topics are placed in historical and cross cultural perspective The new edition of Gun Control in the United States A Reference Handbook enables the reader to navigate and interpret the research to become sufficiently educated on any specific aspect of the gun issue to make an informed decision for example whether to support stricter or more lenient gun control whether to become a gun owner whether to support a particular political party or candidate or whether to develop or to refine a particular philosophy regarding guns Other aspects of the contemporary gun debate that are addressed include whether the Supreme Court s ruling that the Second Amendment guarantees an individual right will withstand future challenges whether the strong gun regulations used in Europe would be effective and applicable in reducing gun violence in the United States and whether the diversity explosion created by the high rate of immigration from countries where guns are strictly controlled will soon change the politics of the U S gun control debate

outline of argumentation theory has been recognizable for centuries or so it has seemed to Western scholars The 2019 Alta Conference on Argumentation co sponsored by the National Communication Association and the American Forensic Association aimed to question the generality of these intellectual traditions This resulting collection of essays deals with the possibility of having local theories of argument local to a particular time a particular kind of issue a particular place or a particular culture Many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse Other scholars are more comfortable with the Western traditions and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances The papers represent different methodologies cover the experiences of different nations at different times examine varying sorts of argumentative events speeches court decisions food choices and sound explore particular personal identities and the issues highlighted by them and have different overall orientations to doing argumentation scholarship Considered together the essays do not generate one simple conclusion but they stimulate reflection about the particularity or generality of the experience of arguing and therefore the scope of our theories
