

## GUIDELINES FOR WRITING & ORGANIZING YOUR RESEARCH PAPER

The following are guidelines for writing and organizing the different sections of a research paper and is organized into the following sections:

- The Title
- The Abstract
- The Introduction Section
- The Methods Section
- The Findings/Results Section
- The Discussion Section
- The Conclusion Section
- The References Section

### 1. The Title

- Be thoughtful when choosing the title of your paper. This is the part of a paper that is the most widely read and most often it is the only thing that is read. Electronic indexing services rely heavily on the accuracy of the title to allow users to find papers that are relevant to their research. A good title should
  - have the fewest possible words that adequately describe the contents of the paper;
  - identify the main issues of the paper;
  - be accurate, unambiguous, specific, and complete;
  - not contain abbreviations unless they are well known by the target audience, and
  - attract readers attention

### 2. The Abstract

- The abstract is intended to capture the interest of the potential audience, and will often determine whether or not readers will read the rest of the paper.
- A poorly written abstract will not encourage interest in your work. It is important therefore to ensure that you take the time to prepare a good abstract that captures the salient points of your paper.
