Byrnes,Jeanne Baxter,2012-01-01 **Active Teaching and Learning Strategies** Rock Moore,Michelle A. Moore,2004 Active Teaching and Active Learning Strategies Creating a Blueprint for Success is the cumulative result of a year of reflecting asking and listening to questions and comments that many have concerning the education of our youth The book s genesis however started many years ago as the state of California along with many other states embraced a standards based accountability system This accountability has now been coupled with the recent addition of The No Child Left Behind Legislation In a real sense we are entering both the best and worst of times I say this because of the effects of high stakes testing and the requirement that all students reach high levels of proficiency which admittedly are very lofty goals For this to be realized changes will be required in teaching and assessment as well as a more concentrated focus on student learning The instructional design introduced in this book advocates four components academic social collaborative contextual and cognitive developmental These components work in tandem with Active Teaching and Learning Strategies Combined they form a student responsive instructional methodology which optimizes student success and academic achievement We wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with The focus of this endeavor is to see all students achieve and succeed and to keep passion and compassion at the heart of all that we do It is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care know how to utilize data practice active teaching strategies and promote the active learning of students Together these characteristics became the design and course of action that Created a Blueprint for Success

Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access Maria Teresa Tatto,Justin Bruner,Fida Hussain Chang,Corvell George Cramfield,Tara Miyoko Kintz,Nai-Cheng Kuo,Sandra Kurtti Pylvainen,Andleeb Sharif,2012-09-17 This book originated in a policy analysis class at Michigan State University taught during 2010 Using Professor Tatto s unique approach to teaching policy analysis the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications we began exploring policies that were developed at the global level and that were implemented locally We investigated the surge of globally developed standards and regulations in an effort to improve education Our goal was to learn cross nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as Education for All EFA and its USA cousin No Child Left Behind NCLB We knew our work would be bounded by the time available in a one semester class and by resource constraints We did

exploratory inquiry supported by literature reviews reports on rigorous research studies and in one case an exploratory case study The policies we chose to explore such as EFA and NCLB offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children the preparation of teachers to support diverse populations the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion Our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness We investigated the factors that seemed to interfere with successful implementation from conceptual theoretical and methodological perspectives In this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs The book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces The book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here

Research on Technology in Social Studies Education John Lee, Adam M. Friedman, 2009-11-01 Despite technology's presence in virtually every public school its documented familiarity and use by youth outside of school and the wealth of resources it provides for teaching social studies there has been relatively little empirical research on its effectiveness for the teaching and learning of social studies In an effort to begin to fill this gap in research literature this book focuses on research on technology in social studies education The objectives of this volume are threefold to describe research frameworks provide examples of empirical research and chart a course for future research endeavors Accordingly the volume is divided into three overarching sections research constructs and contexts research reports and research reviews The need for research is particularly acute within the field of social studies and technology As the primary purpose of social studies is to prepare the young people of today to be the citizens of tomorrow it is necessary to examine how technology tools impact improve and otherwise affect teaching and learning in social studies Given these circumstances we have prepared this collection of research conceptualizations reports and reviews to achieve three goals

- 1 Put forward reports on how research is being conducted in the field
- 2 Present findings from well designed research studies that provide evidence of how specific applications of technology are affecting teaching and learning in social studies
- 3

Showcase reviews of research in social studies It is with this framework that we edited this volume Research on Technology and Social Studies Education as an effort to address emerging concerns related to theorizing about the field and reporting research in social studies and technology The book is divided into four sections The first section of the book includes three descriptions of research constructs and contexts in social studies and technology The second section is focused on research reports from studies of student learning in social studies with technology The third section contains research reports on teachers pedagogical considerations for using technology in social studies In the fourth and final section we present work that broadly reviews and critiques research in focused areas of social studies and technology This volume contains twelve chapters each of which focuses on social studies content and pedagogy and how the field is affected and enhanced with technology The volume includes research and theoretical works on various topics including digital history digital video geography technology use in the K 12 social studies classroom and artificial intelligence
