even more rapidly in the future Only firms that can respond to these changes will survive It is important to know then how business s future landscape will look George Huber s new book *The Necessary Nature of Future Firms* describes this landscape clearly and credibly and makes explicit the organizational attributes and management practices firms must possess to be among the ranks of the future firms Advances in science and technology will continue to affect business environments making them more complex dynamic and competitive Moreover this complexity and dynamism will increase at increasing rates As the book makes clear successful firms will cope with or exploit these changes by increasing their capabilities for correctly interpreting threats and opportunities making decisions acquiring and managing knowledge innovating and changing while simultaneously dealing with the needs for efficiency flexibility and employee commitment *The Necessary Nature of Future Firms* is written for managers especially those managing change Professionals in a wide variety of organizational roles will find it a particularly useful reference for its foresight and as an invaluable tool in winning approval for projects and initiatives Academics in change management information systems organizational science strategy and human resources management can draw on the book as a supplementary text or as a source for lecture materials References housed in endnotes rather than in the text contribute to the book s readability and ease of use as does the accessible writing style But for all its accessibility and reader friendliness *The Necessary Nature of Future Firms* is still firmly grounded in scholarship Hundreds of authoritative works and systematic studies specifically inform this book as do Huber s own studies and his interviews with over 100 middle and upper level managers about changes in their organizations To add meaning and interest the book s insights and conclusions are elaborated with real world examples
