**TYPE OF DEATH (check one):**

☐ Violent    ☐ Suicide    ☐ Casualty    ☐ Sudden when in apparent health  
☐ Cremation    ☒ Suspicious, unusual, or unnatural    ☐ Found dead

AGE 44 RACE W SEX M

DATE OF DEATH (FOUND) 12/1/12

Case No.  
**89-5162**

Decedent:  
**ROLAND JARVIS**

Well... where to begin? I guess I'll start by pointing out the obvious: the body of Roland Jarvis is in a transitory form that has never existed before.

The tissue shows no signs of decay, although Jarvis has been clinically dead for over two weeks now. No rigor, no pooling of body fluids. The flesh remains pliable. Pupils remain clear.

Against my objections, I was instructed to remove part of the liver and attempted to destroy it using numerous methods. Fire, emulsion and caustic acids had no effect. While I could separate various organs and limbs of the decedent with vivisection, I could not destroy the tissue once I did so.

Even more disturbing was that a few moments later, the body would once again be fully whole.

I do not know the length of time this took. Seconds? Minutes?

I tried numerous times to record the moment when Jarvis' corpse would return to its pre-autopsy state, but I was never able to. It was as if my actions at "modifying" the corpse had never happened. Perhaps they didn't.

National Highway Safety Bureau,1970 *Handbook of Clinical Psychology in Medical Settings* Ronald H. Rozensky, Jerry J. Sweet, Steven M. Tavian, 2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book
