Power at the Roots Miranda J. Martinez, 2010-09-25 Through direct engagement with gardeners activists and residents Miranda Martinez shows the breadth and diversity of the community gardening movement and how these groups inserted themselves into local politics and development to create change She demonstrates how real people are effective as social forces amid large scale urban change and looks at the complexities and contradictions involved in transformations of urban neighborhoods One of the most important contributions of this study is its focus on the Puerto Ricans of the Lower East Side and their struggle to sustain its Latinidad It goes deeply into the ethnic and cultural significance at the neighborhood and personal level to show the contradictory meanings of gentrification to Puerto Ricans and others and more importantly the ways that the history and culture of Puerto Ricans are ignored devalued and erased By going to the grassroots this book vividly demonstrates how Puerto Ricans interact with the global and local trends involved in gentrification and how the struggles against displacement can alter the boundaries of the process

Mothers United Andrea Dyrness, 2013-11-30 In urban American school systems the children of recent immigrants and low income parents of color disproportionately suffer from overcrowded classrooms lack of access to educational resources and underqualified teachers The challenges posed by these problems demand creative solutions that must often begin with parental intervention But how can parents without college educations American citizenship English literacy skills or economic stability organize to initiate change on behalf of their children and their community In Mothers United Andrea Dyrness chronicles the experiences of five Latina immigrant

mothers in Oakland California one of the most troubled urban school districts in the country as they become informed and engaged advocates for their children s education These women who called themselves Madres Unidas Mothers United joined a neighborhood group of teachers and parents to plan a new small and autonomous neighborhood based school to replace the overcrowded Whitman School Collaborating with the author among others to conduct interviews and focus groups with teachers parents and students these mothers moved from isolation and marginality to take on unfamiliar roles as researchers and community activists while facing resistance from within the local school district Mothers United illuminates the mothers journey to create their own space centered around the kitchen table that enhanced their capacity to improve their children s lives At the same time Dyrness critiques how community organizers teachers and educational policy makers despite their democratic rhetoric repeatedly asserted their right as experts reproducing the injustice they hoped to overcome A powerful inspiring story about self learning consciousness raising and empowerment Mothers United offers important lessons for school reform movements everywhere

Unearthing Lifestances Lori G. Beaman,Ryan T. Cragun,Douglas Ezzy,2025-11-03

A growing number of people across the western world are identifying as nonreligious This book examines this shift through the lens of community gardens We do not ask people what they believe in ways that are abstracted from their everyday lives Rather by focusing on gardening we enter the world of action what people do the practices of their everyday lives Drawing on interviews from community gardeners in Argentina Australia Brazil Canada England Finland Norway Northern Ireland and the United States the book explores themes of community building ritual ethics and relationships with humans non humans and the natural world arguing for their conceptualization as lifestances The book reveals a shifting sensibility about the relationship between humans and the world around them That relationship is shifting from a vertical relationship to a horizontal one from a relationship of human dominance to a relationship of shared responsibility and equality This is possible because there is an increasing recognition that the current hierarchical model based in religious teachings and human exceptionalism is untenable Community gardens offer an ideal vantage point from which to explore these changes
