**A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum** Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students

and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at [www.wmich.edu/cmp](http://www.wmich.edu/cmp) for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century

**It Pays to be an Engineer**, 1985 *Time for Learning* Kathleen P. Fulton, 2014-05-22 The guide school leaders need to reap the rewards of education s most exciting new trend Flipping classrooms using class time for hands on learning and off loading the lecture portion of lessons to teacher created videos or other technology presentations assigned as homework is taking schools by storm But like all hot trends it is important to apply this innovation intelligently especially at the system wide level This book makes a persuasive case to leaders for the potential benefits of flipping Backed by powerful data and compelling anecdotes this book covers Data on positive student outcomes in terms of achievement and motivation How flipping gives teachers more time to work with students one on one and encourage peer learning Ways flipping can benefit teacher learning and collaboration Why flipping encourages students to take responsibility for their own learning How flipping engages students in 21st century skills Ways flipping is budget and resource friendly With this book you can take a major step towards the future of education utilizing technology and advanced understanding of how students learn best Flipped classrooms empower teachers to engage students in deeper learning This book gives readers ten reasons for joining forces to make this possibility a reality Tom Carroll President National Commission on Teaching and America s Future I highly recommend this book for any educator interested in flipping the classroom to reinvent the learning process The
