Student Assessment in Calculus Alan H. Schoenfeld, 1997 It doesn't matter whether you teach a reform or traditional course whether you have large or small sections or whether you use lectures or laboratories The bottom line is the same When all is said and done what counts is what our students understand And that's what Student Assessment in Calculus is about Back cover **Precalculus with Trigonometry** Deborah Davies (Mathematics teacher), Paul A. Foerster, Judy Stringham, 2003 Science & Engineering Indicators, 1996 Bold Ventures S. Raizen, E.D. Britton, 2012-12-06 This book presents comprehensive results from case studies of three innovations in mathematics education that have much to offer toward understanding current reforms in this field Each chapter tells the story of a case in rich detail with extensive documentation and in the voices of many of the participants the innovators the teachers the students Similarly Volume 2 of Bold Ventures presents the results from case studies of five innovations in science education Volume 1 provides a cross case analysis of all eight innovations Many U S readers certainly will be very familiar with the name of at least if not all of the mathematics innovations discussed in this volume for one example the NCTM Standards and probably with their general substance Much of the education community's familiarity with these arises from the projects own dissemination efforts The research reported in this volume however is one of the few detailed studies of these innovations undertaken by researchers outside the projects themselves
