READ THESE INSTRUCTIONS FIRST

Do not open this booklet until you are told to do so.

Write your name, class and index number clearly in the spaces provided at the top of this page.

Write in dark blue or black pen on both sides of the paper.

You may use a pencil for any diagrams, graphs or rough working.

Do not use highlighters or correction fluid.

Answer all questions.

If working is needed for any question it must be shown with the answer.

Omission of essential working will result in loss of marks.

Calculators should be used where appropriate.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142, unless the question requires the answer in terms of π .

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is 80.

New Ways of Teaching and Learning Janina Morska, Alan Rogerson, This volume contains the papers presented at the Third International Symposium on New Ways of Teaching Learning held from August 6 10 2024 at the Aemilia Hotel Bologna Italy The Conference was organized by The Mathematics Education for the Future Project an international educational project founded in 1986 and dedicated to innovation in mathematics statistics science and computer education world wide

Virtual Fundamental Cycles in Symplectic Topology John W. Morgan, Dusa McDuff, Mohammad Tehrani, Kenji Fukaya, Dominic Joyce, 2019-04-12 The method of using the moduli space of pseudo holomorphic curves on a symplectic manifold was introduced by Mikhail Gromov in 1985 From the appearance of Gromov's original paper until today this approach has been the most important tool in global symplectic geometry To produce numerical invariants of these manifolds using this method requires constructing a fundamental cycle associated with moduli spaces This volume brings together three approaches to constructing the virtual fundamental cycle for the moduli space of pseudo holomorphic curves All approaches are based on the idea of local Kuranishi charts for the moduli space Workers in the field will get a comprehensive understanding of the details of these constructions and the assumptions under which they can be made These techniques and results will be essential in further applications of this approach to producing invariants of symplectic manifolds

Handbook of Test Development Suzanne Lane, Mark R. Raymond, Thomas M. Haladyna, 2015-10-08 The second edition of the Handbook of Test Development provides graduate students and professionals with an up to date research oriented guide to the latest developments in the field Including thirty two chapters by well known scholars and practitioners it is divided into five sections covering the foundations of test development content definition item development test design and form assembly and the processes of test administration documentation and evaluation Keenly aware of developments in the field since the publication of the first edition including changes in technology the evolution of psychometric theory and the increased demands for effective tests via educational policy the editors of this edition include new chapters on assessing noncognitive skills measuring growth and learning progressions automated item generation and test assembly and computerized scoring of constructed responses The volume also includes expanded coverage of performance testing validity fairness and numerous other topics Edited by Suzanne Lane Mark R Raymond and Thomas M Haladyna The Handbook of Test Development 2nd edition is based on the revised Standards for Educational and Psychological Testing and is appropriate for graduate courses and seminars that deal with test development and usage professional testing services and credentialing agencies state and local boards of education and academic libraries serving these groups

Readings in Artificial Intelligence Bonnie Lynn Webber, Nils J. Nilsson, 2014-05-12 Readings in Artificial Intelligence focuses on the principles methodologies advancements and approaches involved in artificial intelligence The selection first elaborates on representations of problems of reasoning about actions a problem similarity approach to devising

heuristics and optimal search strategies for speech understanding control Discussions focus on comparison with existing speech understanding systems empirical comparisons of the different strategies analysis of distance function approximation problem similarity problems of reasoning about action search for solution in the reduction system and relationship between the initial search space and the higher level search space The book then examines consistency in networks of relations non resolution theorem proving using rewriting rules for connection graphs to prove theorems and closed world data bases The manuscript tackles a truth maintenance system elements of a plan based theory of speech acts and reasoning about knowledge and action Topics include problems in reasoning about knowledge integration knowledge and action models of plans compositional adequacy truth maintenance mechanisms dialectical arguments and assumptions and the problem of control The selection is a valuable reference for researchers wanting to explore the field of artificial intelligence

The DARPA Model for Transformative Technologies: Perspectives on the U.S. Defense Advanced Research Projects Agency
William Boone Bonvillian, Richard Van Atta, Patrick Windham, 2020-01-09

The authors have done a masterful job of charting the important story of DARPA one of the key catalysts of technological innovation in US recent history By plotting the development achievements and structure of the leading world agency of this kind this book stimulates new thinking in the field of technological innovation with bearing on how to respond to climate change pandemics cyber security and other global problems of our time The DARPA Model provides a useful guide for governmental agency and policy leaders and for anybody interested in the role of governments in technological innovation Dr Kent Hughes Woodrow Wilson International Center for Scholars This volume contains a remarkable collection of extremely insightful articles on the world's most successful advanced technology agency Drafted by the leading US experts on DARPA it provides a variety of perspectives that in turn benefit from being presented together in a comprehensive volume It reviews DARPA's unique role in the US innovation system as well as the challenges DARPA and its clones face today As the American model is being considered for adoption by a number of countries worldwide this book makes a welcome and timely contribution to the policy dialogue on the role played by governments in stimulating technological innovation Prof Charles Wessner Georgetown University The US Defense Advanced Research Projects Agency DARPA has played a remarkable role in the creation new transformative technologies revolutionizing defense with drones and precision guided munitions and transforming civilian life with portable GPS receivers voice recognition software self driving cars unmanned aerial vehicles and most famously the ARPANET and its successor the Internet Other parts of the US Government and some foreign governments have tried to apply the DARPA model to help develop valuable new technologies But how and why has DARPA succeeded Which features of its operation and environment contribute to this success And what lessons does its experience offer for other US agencies and other governments that want to develop and demonstrate their own transformative technologies This book is a remarkable collection of leading academic research on DARPA from a wide range of perspectives combining to chart an important story

Scientific and Technical Aerospace Reports, 1966 *TORUS 2 - Toward an Open Resource Using Services* Dominique Laffly, 2020-04-09 This book presented in three volumes examines environmental disciplines in relation to major players in contemporary science Big Data artificial intelligence and cloud computing Today there is a real sense of urgency regarding the evolution of computer technology the ever increasing volume of data threats to our climate and the sustainable development of our planet As such we need to reduce technology just as much as we need to bridge the global socio economic gap between the North and South between universal free access to data open data and free software open source In this book we pay particular attention to certain environmental subjects in order to enrich our understanding of cloud computing These subjects are erosion urban air pollution and atmospheric pollution in Southeast Asia melting permafrost causing the accelerated release of soil organic carbon in the atmosphere alert systems of environmental hazards such as forest fires prospective modeling of socio spatial practices and land use and web fountains of geographical data Finally this book asks the question in order to find a pattern in the data how do we move from a traditional computing model based world to pure mathematical research After thorough examination of this topic we conclude that this goal is both transdisciplinary and achievable **Noncooperative Approaches to the Theory of Perfect Competition** Andreu Mas-Colell, 2014-05-10 *Economic Theory Econometrics and Mathematical Economics A Series of Monographs and Textbooks Noncooperative Approaches to the Theory of Perfect Competition* focuses on the application of noncooperative approaches to the theory of perfect competition including Cournot game no surplus condition and Nash equilibria The selection first elaborates on collusive behavior in noncooperative epsilon equilibria of oligopolies with long but finite lives and noncooperative price taking in large dynamic markets Discussions focus on noncooperative equilibria which support the monopoly allocation alternative definition of perfect epsilon equilibrium one period Cournot game fixed demand case and replication case The book takes a look at noncooperative price taking in large dynamic markets no surplus condition as a characterization of

perfectly competitive equilibrium perfect competition profit criterion and the organization of economic activity Topics include profits to individually improving welfare structure of firms competitive allocations as no surplus allocations profits as rents Walrasian and perfectly competitive equilibrium and no surplus and core equivalence as alternative characterizations of perfectly competitive equilibrium The manuscript ponders on Nash equilibria of market games and efficiency properties of strategic market games as well as commodities agents assignments strategic markets games proper and full Cournot Nash equilibria and finiteness and inefficiency The selection is a valuable source of data for researchers interested in noncooperative approaches to the theory of perfect competition Ulrich's International Periodicals Directory Carolyn Farquhar Ulrich,1998 **Cognition and Instruction** David Klahr,2014-01-14 First published in 1987 The author argues that information processing psychology has come to dominate the experimental study of complex human behaviour Such rapid success suggests that the approach will have as much of an impact on psychology in the field as it has had on psychology in the laboratory The chapters in this volume indicate the extent to which this potential has already begun to be realized The book is divided into four parts The first three parts include sets of research contributions followed by discussions and the fourth part contains three chapters that offer critiques syntheses and evaluations of various aspects of the preceding papers **Theoretical Aspects of Reasoning About Knowledge** Joseph Y. Halpern,2014-05-12 Theoretical Aspects of Reasoning About Knowledge Proceedings of the 1986 Conference focuses on the principles methodologies approaches and concepts involved in reasoning about knowledge The selection first provides an overview of reasoning about knowledge varieties of self reference and pegs and alecs Topics covered include data semantics partial objects and identity circumstance self and causal connection structure of circumstance varieties and limits of self reference problem of logical omniscience and knowledge communication and action The book then explores reasoning about knowledge in artificial intelligence synthesis of digital machines with provable epistemic properties and a first order theory of planning knowledge and action The publication ponders on the consistency of syntactical treatments of knowledge foundations of knowledge for distributed systems knowledge and implicit knowledge in a distributed environment and the logic of distributed protocols Topics include formal syntax and semantics structure of models message based knowledge worlds changing the class of messages implicit knowledge in message based knowledge worlds conservation and implicit knowledge and distributed protocols The selection is a dependable source of data for researchers interested in the theoretical aspects of reasoning about knowledge **A Directory of Computer Software Applications** ,1979 Captured Eagles Frederick A. Johnsen,2014-10-20 The growth in size lethality and technology of the German Luftwaffe was of concern to some defense planners in the United States before American entry into the war Learning about the Luftwaffe became a significant effort once the conflict broke out in Europe From defectors with German aircraft to battlefield trophies and combat crew reports the race to understand German aero technology took on sometimes heroic proportions After the war German technology

infused American aerospace developments in many ways German ribbon parachutes were evaluated for high speed bailouts sweptwing leading edge slat technology benefited the F 86 Sabre overall comprehension of sweptwing benefits to fast jet aircraft was validated pulse jet V1s and supersonic V2 rockets boosted American drone weapon ballistic missile and space exploration efforts In this volume Frederick A Johnsen traces that path of discovery Separation of Flow Paul K. Chang,2014-06-28 Interdisciplinary and Advanced Topics in Science and Engineering Volume 3 Separation of Flow presents the problem of the separation of fluid flow This book provides information covering the fields of basic physical processes analyses and experiments concerning flow separation Organized into 12 chapters this volume begins with an overview of the flow separation on the body surface as discusses in various classical examples This text then examines the analytical and experimental results of the laminar boundary layer of steady two dimensional flows in the subsonic speed range Other chapters consider the study of flow separation on the two dimensional body flow separation on three dimensional body shape and particularly on bodies of revolution This book discusses as well the analytical solutions of the unsteady flow separation The final chapter deals with the purpose of separation flow control to raise efficiency or to enhance the performance of vehicles and fluid machineries involving various engineering applications This book is a valuable resource for engineers

Nonlinear Control Systems Design 1989 A. Isidori,2014-05-23 In the last two decades the development of specific methodologies for the control of systems described by nonlinear mathematical models has attracted an ever increasing interest New breakthroughs have occurred which have aided the design of nonlinear control systems However there are still limitations which must be understood some of which were addressed at the IFAC Symposium in Capri The emphasis was on the methodological developments although a number of the papers were concerned with the presentation of applications of nonlinear design philosophies to actual control problems in chemical electrical and mechanical engineering Catalogue of the Library of the Graduate School of Design, Harvard University Harvard University.
