HBSC Ireland: child well-being in South County Dublin.

Introduction

Health Behaviour in School-aged Children (HBSC) is a cross-national research study conducted in collaboration with the World Health Organisation (European Office). The study runs on a four-year cycle and in 2006 there were 41 participating countries across Europe and North America. HBSC collects data on key indicators of health, health attitudes and health behaviours, as well as the contexts of health for young people. The study is a school-based survey with information collected from students through self-completion questionnaires in classrooms. Further information on the

The most recent HBSC Ireland dataset comprises 10,344 children from 5th class in primary school to 5th year in post-primary schools. The methods employed comply with the International HBSC protocol and are detailed in the first national report from the 2006 survey, which can be found
