Writing the Classroom Stephen E. Neaderhiser, 2022-11-21 Writing the Classroom explores how faculty compose and use pedagogical documents to establish classroom expectations and teaching practices as well as to articulate the professional identities they perform both inside and outside the classroom The contributors to this unique collection employ a wide range of methodological frameworks to demonstrate how pedagogical genres even ones as seemingly straightforward as the class syllabus have lives extending well beyond the classroom as they become part of how college teachers represent their own academic identities advocate for pedagogical values and negotiate the many external forces that influence the act of teaching Writing the Classroom shines a light on genres that are often treated as two dimensional with purely functional purposes arguing instead that genres like assignment prompts course proposals teaching statements and policy documents play a fundamental role in constructing the classroom and the broader pedagogical enterprise within academia Writing the Classroom calls on experienced teachers and faculty administrators to critically consider their own engagement with pedagogical genres and offers graduate students and newer faculty insight into the genres that they may only now be learning to inhabit as they seek to establish their personal teacherly identities It showcases the rhetorical complexity of the genres written in the service of pedagogy not only for students but also for the many other audiences within academia that have a role in shaping the experience of teaching Contributors Michael Albright Lora Arduser Lesley Erin Bartlett Logan Bearden Lindsay Clark Dana Comi Zack K De Piero Matt Dowell Amy Ferdinandt Stolley Mark A Hannah Megan Knight Laura R Micciche Cindy Mooty Dustin Morris Kate Navickas Kate Nesbit Jim Nugent Lori A Ostergaard Cynthia Pengilly Jessica Rivera Mueller Christina Saidy Megan Schoen Virginia Schwarz Christopher Toth

Handbook of Research on Critical Thinking Strategies in Pre-Service Learning Environments Mariano, Gina J., Figliano, Fred J., 2019-01-25. Learning strategies for critical thinking are a vital part of today's curriculum as students have few additional opportunities to learn these skills outside of school environments. Therefore, it is of utmost importance for pre-service teachers to learn how to infuse critical thinking skill development in every academic subject to assist future students in developing these skills. The *Handbook of Research on Critical Thinking Strategies in Pre-Service Learning Environments* is a collection of innovative research on the methods and applications of critical thinking that highlights ways to effectively use critical thinking strategies and implement critical thinking skill development into courses. While highlighting topics including deep learning, metacognition, and discourse analysis, this book is ideally designed for educators, academicians, researchers, and students.

Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation Fovet, Frederic, 2021-01-22. Universal design for learning (UDL) has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments. In recent years, UDL has gone beyond the field of disability and been explored with regards to international and indigenous students. There is now a sizable body of literature that details the benefits of implementing UDL in higher education as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions. There is, however, still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms. Therefore, there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like. The *Handbook of Research on Applying Universal Design for Learning Across Disciplines: Concepts, Case Studies, and Practical Implementation* offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats as well as across the undergraduate and graduate sectors. The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments. While highlighting UDL in areas such as educational technology, student engagement, assignment design, and inclusive education, this book is ideally intended for inservice and preservice teachers, administrators, teacher educators, higher education professors, and leaders, practitioners, researchers, academicians, and students interested in the integration of UDL into strategic academic plans. *Library*
