Anthropocene Five Volume Set presents a currency based global synthesis cataloguing the impact of humanity's global ecological footprint. Covering a multitude of aspects related to Climate Change, Biodiversity, Contaminants, Geological Energy, and Ethics, leading scientists provide foundational essays that enable researchers to define and scrutinize information, ideas, relationships, meanings, and ideas within the Anthropocene concept. Questions widely debated among scientists, humanists, conservationists, politicians, and others are included, providing discussion on when the Anthropocene began, what to call it, whether it should be considered an official geological epoch, whether it can be contained in time, and how it will affect future generations. Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century, the term Anthropocene was only first used by ecologist Eugene Stoermer in the 1980s and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000. Presents comprehensive and systematic coverage of topics related to the Anthropocene with a focus on the Geosciences and Environmental science. Includes point counterpoint articles debating key aspects of the Anthropocene, giving users an even handed navigation of this complex area. Provides historic seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time.

Downhill from Here Katherine S. Newman, 2025-06-25 A sharp examination of the looming financial catastrophe of retirement in America. As millions of Baby Boomers reach their golden years, the state of retirement in America is little short of a disaster. Nearly half the households with people aged 55 and older have no retirement savings at all. The real estate crash wiped out much of the home equity that millions were counting on to support their retirement. And the typical Social Security check covers less than 40% of pre-retirement wages, a number projected to drop to under 28% within two decades. Old age poverty, a problem we thought was solved by the New Deal, is poised for a resurgence. With dramatic statistics and vivid portraits, acclaimed sociologist Katherine S. Newman shows that the American retirement crisis touches us all, cutting across class lines and generational divides. White collar managers have seen retirement benefits vanish. Teamsters have had their pensions cut in half. Bankrupt cities like Detroit have walked away from their commitments to municipal workers. And for Generation X, the prospects are even worse: a fifth of them expect to never be able to retire. Only the vaunted one percent can face retirement without fear. Other countries are confronting similar demographic challenges, yet they have not abandoned their social contract with seniors. *Downhill From Here* makes it clear that America too can and must do better.

Background Papers on The IMF and the Crises in Greece, Ireland, and Portugal Moisés J. Schwartz, Shinji Takagi, 2017-06-30 This volume book brings together nine background papers prepared for an evaluation by the IMF Independent Evaluation Office of the IMF and the crises in Greece, Ireland, and Portugal. It presents an authoritative work on the evolving relationship between the IMF and the euro area, a common currency area founded in 1999 consisting of advanced, highly integrated economies in Europe. The euro area, or any common currency area for that matter, has posed challenges to the IMF's operational activities as its Articles of Agreement contain no provision for

joint membership The challenges became intense when a series of crises erupted in Greece Ireland and Portugal from 2009 to 2011 and the Fund was called upon to help intervene by offering its financing and crisis management expertise The IMF found itself in uncharted territory where there was no precedent or established procedure The chapters many of which are prepared by prominent academics and former senior IMF officials who are thoroughly familiar with internal procedures discuss various aspects of the IMF s engagement with the euro area including precrisis surveillance how key decisions were made how the IMF collaborated with European institutions and how it designed and implemented its lending programs with the three crisis countries The book gives prominence to governance related issues given the large voting share of more than 20 percent within the IMF of euro area members and the subsequent public perception that the IMF treated the euro area more favorably than it does developing and emerging market members The approaches are both cross cutting and country based Some chapters deal with issues related to the euro area as a whole while others focus on how the Fund engaged with individual euro area countries The book contains a statement on the IEO evaluation by the IMF Managing Director and a Summing Up of the Executive Board discussion held in July 2016 *Strategically important metals* Great Britain:

Parliament: House of Commons: Science and Technology Committee,2011-05-17 Although most strategic metal reserves are unlikely to run out over the coming decades the perception of scarcity of certain minerals and metals may lead to increased speculation and volatility in price and supply Strategically important metals are vital to advanced manufacturing low carbon technologies and other growing industries and the Government should provide reliable information on potential resource risks in a coordinated and coherent way The UK also exports large quantities of scrap metal and waste electrical and electronic equipment WEEE often to developing countries This metal not only is a potential resource for the UK but it is also an example of the UK exporting its environmental problems elsewhere There are also concerns about the illegal export of WEEE which is often labelled as second hand equipment for re use and calls for safeguards to be put in place Despite a rate of 90% by weight metal recycling in the UK it is of great concern that some strategic metals are likely to be lost in the 10% not being recycled The report recommends Improving existing legislation to ensure companies implement requirements on reporting non financial information such as human rights and health and safety issues an evaluation by the Government of the potential for introducing similar legislation to that in the US whereby companies are required to produce detailed reports on conflict minerals that they use This report also brings the alleged activities of large dealers on the London Metals Exchange to the attention of the Office of Fair Trading Finally the report looks at domestic extraction and says planning regulations should not unnecessarily restrict the use of significant potential reserves and that domestic mining could alleviate risks associated with sourcing metals from external supply monopolies In parallel the Government has to invest in research to ensure that future domestic mining has the least possible environmental impact **Digital Cultures** Smeeta Mishra,2021-02-15 The book explores contemporary selfie taking practices digital experiences of love romance and infidelity
