Handbook of Material Culture Chris Tilley,Webb Keane,Susanne Kuechler,Mike Rowlands,Patricia Spyer,2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes an unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies Study Guide James Schmiechen,2004 **Atlas of World Art** John Onians,2004 Combines a survey of world art with maps showing the associations and dissemination of culture across the globe The Great Unbundling J. Y. Sterling,2025-07-04 For hundreds of thousands of years the story of human success was the story of a unique and powerful package In what this groundbreaking book calls the era of the Bundled Ape our ancestors dominated the planet by combining analytical

intelligence emotional connection and physical dexterity within a single vessel the individual human Our societies economies and even our myths were built on the assumption that the person with the idea is also the one who feels the passion directs the hands and experiences the consequences Now that bundle is coming apart In *The Great Unbundling* the author presents a stunning new thesis for understanding our turbulent times The true disruption of artificial intelligence is not that it is a new tool but that it is the engine of a historical process that is systematically isolating each of our core functions improving them beyond human capacity and rendering the original human package obsolete This unbundling is being driven at a breakneck pace by the relentless profit seeking engine of modern capitalism which sees in AI the ultimate instrument for maximizing efficiency The evidence is everywhere The Unbundling of Labor Generative AI is poised to automate or degrade the work of 300 million full time employees striking at the heart of the knowledge economy from law and finance to journalism and medicine The Unbundling of Intelligence For the first time raw problem solving capability is being divorced from conscious understanding An AI can pass the medical licensing exams without knowing what it means to heal or ace the bar exam without a concept of justice forcing us to ask what expertise truly means The Unbundling of Connection In an age of profound loneliness AI is stepping in to meet our most fundamental needs With AI companions parasocial relationships and algorithmically curated communities emotional fulfillment is being unbundled from the messy unpredictable and deeply rewarding work of human to human connection What happens to a species whose core evolutionary advantage has been deconstructed and outsourced What is the economic value of a human being in a world where our bundled skills are no longer competitive This leads to the crisis of humanism itself and forces us to consider radical solutions like Universal Basic Income not as a political choice but as a potential civilizational necessity in the face of a useless class But this is not another prophecy of doom The unbundling is not an endpoint but a turning point *The Great Unbundling* is the first book to chart the powerful counter current that is rising in response *The Great Re bundling* This is the story of the conscious human effort to forge a new purpose From the new artisans who are building thriving businesses on the very integrated authentic human skills that AI cannot replicate to the political movements and policymakers fighting to subordinate this new technology to human values a new path is being forged *The Great Unbundling* is a profound deeply researched and ultimately hopeful guide to the most important transition of our lifetime It provides the essential framework for understanding the forces reshaping our world and offers a stirring vision for how we can actively create our future This provocative and insightful work argues that we are at a civilizational crossroads We can either passively accept our unbundling or begin the conscious creative and difficult work of forging a new human purpose Essential reading for aficionados of Yuval Noah Harari Nick Bostrom and Kai Fu Lee *The Great Unbundling* is sure to spark debate and will forever change how you think about the future of humanity

The Archaeology of Seeing Liliana Janik, 2020-01-28 The Archaeology of Seeing provides readers with a new and provocative understanding of material culture through exploring visual narratives captured in cave and rock art sculpture paintings and more The engaging argument draws on current thinking in archaeology on how we can interpret the behaviour of people in the past through their use of material culture and how this affects our understanding of how we create and see art in the present Exploring themes of gender identity and story telling in visual material culture this book forces a radical reassessment of how the ability to see makes us and our ancestors human as such it will interest lovers of both art and archaeology Illustrated with examples from around the world from the earliest art from hundreds of thousands of years ago to the contemporary art scene including street art and advertising Janik cogently argues that the human capacity for art which we share with our most ancient ancestors and cousins is rooted in our common neurophysiology The ways in which our brains allow us to see is a common heritage that shapes the creative process what changes according to time and place are the cultural contexts in which art is produced and consumed The book argues for an innovative understanding of art through the interplay between the way the human brain works and the culturally specific creation and interpretation of meaning making an important contribution to the debate on art archaeology
