Madrazo, Jr., 1990 *Inside Book Publishing* Angus Phillips, Giles Clark, 2019-08-09 Now fully revised and updated for its sixth edition Inside Book Publishing is the classic introduction to the book publishing industry Giles Clark and Angus Phillips offer authoritative coverage of all sectors of the industry from commercial fiction and non fiction to educational publishing and academic journals They reveal how publishers continue to adapt to a fast changing and highly interconnected world in which printed books have proved resilient alongside ebooks and the growth of audio Major themes are explored including the development of digital products and the use of social media in book marketing as well as those that affect publishers businesses such as the rise of internet retailing rental models for student textbooks and open access where academic content is free to the user Case studies from industry experts give fascinating perspectives on topics such as crowdfunding self publishing and how authors can market themselves The book provides excellent overviews of the main aspects of the publishing process commissioning authors product development design and production marketing sales and distribution As a manual for those in the profession and a guide for the potential publishers of the future Inside Book Publishing remains a seminal work for anyone with an interest in the industry It will also be of interest to authors seeking an insider's view of this exciting industry *Discovery and Explanation in Biology and Medicine* Kenneth F. Schaffner, 1993 Kenneth F Schaffner compares the practice of biological and medical research and shows how traditional topics in philosophy of science such as the nature of theories and of explanation can illuminate the life sciences While Schaffner pays some attention to the conceptual questions of evolutionary biology his chief focus is on the examples that immunology human genetics neuroscience and internal medicine provide for examinations of the way scientists develop examine test and apply theories Although traditional philosophy of science has regarded scientific discovery the questions of creativity in science as a subject for psychological rather than philosophical study Schaffner argues that recent work in cognitive science and artificial intelligence enables researchers to rationally analyze the nature of discovery As a philosopher of science who holds an M D he has examined biomedical work from the inside and uses detailed examples from the entire range of the life sciences to support the semantic approach to scientific theories addressing whether there are laws in the life sciences as there are in the physical sciences Schaffner's novel use of philosophical tools to deal with scientific research in all of its complexity provides a distinctive angle on basic questions of scientific evaluation and explanation The Myth of the Great Ending Joseph M. Felser, 2025-09-12 From Christian believers in the Apocalypse and the Rapture to New Age enthusiasts of

prophecies concerning the year 2012 Doomsday lore has been a part of culture a myth that colors how we perceive the world Why do we remain obsessed with Doomsday myths even when they fail to materialize What if we haven't recognized the true message of these myths Blending history psychology metaphysics and story philosopher and author Joseph Felser explores the spiritual questions raised by these enduring myths Along the way he consults the work of Joseph Campbell Carl Jung Marie Louise von Franz Black Elk Wovoka Itzhak Bentov Jane Roberts Seth Hermann Hesse Ingo Swann David Bohm Fred Alan Wolf J Allen Boone William James and Robert Monroe through ever widening circles of understanding Felser suggests that our obsession with The End of the World hides a repressed healthy longing for reconciliation with our inner and outer worlds with nature and our own natural spirituality He urges us to recognize and act upon that longing When we begin to listen to nature's voice and pay heed to our own dreams including visions intuitions and instinctive promptings the greatest revolution in all history will unfold We can create a future of our own choosing a beginning rather than an ending

Darwin's Psychology Ben Bradley, 2020-09-11 Darwin has long been hailed as forefather to behavioural science especially nowadays with the growing popularity of evolutionary psychologies Yet until now his contribution to the field of psychology has been somewhat understated This is the first book ever to examine the riches of what Darwin himself wrote about psychological matters It unearths a Darwin new to contemporary science whose first concern is the agency of organisms from which he derives both his psychology and his theory of evolution A deep reading of Darwin s writings on climbing plants and babies blushing and bower birds worms and facial movements shows that for Darwin evolution does not explain everything about human action Group life and culture are also keys whether we discuss the dynamics of conscience or the dramas of desire Thus his treatment of facial actions sets out from the anatomy and physiology of human facial movements and shows how these gain meanings through their recognition by others A discussion of blushing extends his theory to the way reading others expressions rebounds on ourselves I care about how I think you read me This dynamic proves central to how Darwin understands sexual desire the production of conscience and of social standards through group dynamics and the role of culture in human agency Presenting a new Darwin to science and showing how widely Darwin s understanding of evolution and agency has been misunderstood and misrepresented in biology and the social sciences this important new book lights a new way forward for those who want to build psychology on the foundation of evolutionary biology
