English language **Scientific Computing with MATLAB and Octave** Alfio Quarteroni,Fausto Saleri,2007-06-21 Preface to the First Edition This textbook is an introduction to Scienti c Computing We will illustrate several numerical methods for the computer solution of c tain classes of mathematical problems that cannot be faced by paper and pencil We will show how to compute the zeros or the integrals of continuous functions solve linear systems approximate functions by polynomials and construct accurate approximations for the solution of di erential equations With this aim in Chapter 1 we will illustrate the rules of the game that computers adopt when storing and operating with realand complex numbers vectors and matrices In order to make our presentation concrete and appealing we will 1 adopt the programming environment MATLAB as a faithful c panion We will gradually discover its principal commands statements and constructs We will show how to execute all the algorithms that we introduce throughout the book This will enable us to furnish an mediate quantitative assessment of their theoretical properties such as stability accuracy and complexity We will solve several problems that will be raised through exercises and examples often stemming from s ci c applications Perturbed Gradient Flow Trees and A∞-algebra Structures in Morse Cohomology Stephan Mescher,2018-04-25 This book elaborates on an idea put forward by M Abouzaid on equipping the Morse cochain complex of a smooth Morse function on a closed oriented manifold with the structure of an A algebra by means of perturbed gradient flow trajectories This approach is a variation on K Fukaya s definition of Morse A categories for closed oriented manifolds involving families of Morse functions To make A structures in Morse theory accessible to a broader audience this book provides a coherent and detailed treatment of Abouzaid s approach including a discussion of all relevant analytic notions and results requiring only a basic grasp of Morse theory In particular no advanced algebra skills are required and the perturbation theory for Morse trajectories is completely self contained In addition to its relevance for finite dimensional Morse homology this book may be used as a preparation for the study of Fukaya categories in symplectic geometry It will be of interest to researchers in mathematics geometry and topology and to graduate students in mathematics with a basic command of the Morse theory **Mathematical Foundations of Computer Science 1996** Wojciech Penczek,Andrzej Szalas,1996-08-07 This book constitutes the refereed proceedings of the 21st International Symposium on Mathematical Foundations of Computer Science MFCS 96 held in Crakow Poland in September 1996 The volume presents 35 revised full papers selected from a total of 95 submissions together with 8 invited papers and 2 abstracts of invited talks The papers included cover issues from the whole area of theoretical computer science with a certain emphasis on mathematical and logical foundations The 10 invited presentations are of particular value **Financial Engineering and Computation** Yuh-Dauh Lyuu,2002 A comprehensive text and reference first published in 2002 on the theory of financial engineering with numerous algorithms for pricing risk management and portfolio management **Intelligent Systems** Cornelius T. Leondes,2018-10-08 Intelligent systems or artificial intelligence technologies are playing an increasing role in areas ranging from medicine to the major manufacturing industries to financial markets The consequences of flawed

artificial intelligence systems are equally wide ranging and can be seen for example in the programmed trading driven stock market crash of October 19 1987 Intelligent Systems Technology and Applications Six Volume Set connects theory with proven practical applications to provide broad multidisciplinary coverage in a single resource In these volumes international experts present case study examples of successful practical techniques and solutions for diverse applications ranging from robotic systems to speech and signal processing database management and manufacturing
