This *2016 Ozone Plan* addresses the federal mandates related to the 2008 8-hour ozone National Ambient Air Quality Standards (NAAQS). Building on decades of developing and implementing effective air pollution control strategies, this plan demonstrates that District regulatory measures meet and exceed federal Clean Air Act (CAA) requirements, includes additional commitments for potential further reductions in emissions, and ensures expeditious attainment.

The deadline for the San Joaquin Valley (Valley) to attain the 2008 8-hour ozone standard is December 31, 2031. This requires another 207.7 tons per day in NO_x reductions from stationary and mobile sources throughout the Valley. The measures identified in this plan do achieve the necessary reductions. The District could show expeditious attainment without the need to rely on "Black Box" provisions afforded under CAA §182(e)(5). Unfortunately, compliance with the contingency requirements under the federal Clean Air Act requires that the District hold back on 1.6 tons per day of NO_x reductions. To ensure that the plan is approvable with the necessary contingencies, the plan needs to include a "Black Box". The District however hopes that the state Air Resources Board (ARB) or the federal Environmental Protection Agency (EPA) can adopt and implement necessary strategies relating to mobile sources resulting in further reductions in emissions that could satisfy contingency requirements and avoid delays in attaining the standard expeditiously.

The District is pursuing legislative efforts to modernize the Clean Air Act with common sense provisions that help prevent similar circumstances as described above for this plan or for future plans where the contingency requirements can actually lead to delayed attainment or reliance on undefined strategies under "Black Box" provisions.

Since 1992, the District has adopted numerous attainment plans to reduce ozone and particulate precursor emissions. Leaving no stone unturned, the District has implemented these plans and adopted over 600 rules and rule amendments that have resulted in significant emissions reductions. Many of the District's innovative rules and strategies, such as Indirect Source Review, Glass Melting Furnaces, and Conservation Management Practices, now serve as models for the rest of the nation. In addition to having the toughest air regulations in the nation, the District also has the most effective and efficient incentive grants program. Through implementation of District regulations and incentives, Valley businesses and residents have invested billions of dollars to reduce emissions. To date, the District's incentive programs have invested a total of \$1.4 billion in public/private funding towards clean air projects, resulting in over 120,000 tons of emissions reduced.

Through these combined efforts, the Valley's air quality is better than it has been at any other time on record. The ozone precursor emissions in the Valley are at historically low levels with approximately 80% reduction in NO_x stationary source emissions since 1990 (see Figure ES-1).
