Computational Techniques And Applications: Ctac 97 - Proceedings Of The Eight Biennial Conference John Noye, Andrew Gill, Michael Teubner, 1998-08-08 This proceedings volume contains three invited papers and 93 contributed papers The topics covered range from studies of theoretical aspects of computational methods to simulation of industrial processes with an emphasis on the efficient use of computers to solve practical problems Developers and users of computational techniques who wish to keep up with recent developments in the application of modern computational technology to problems in science and engineering will have much interest in this volume

Marine Hydrodynamics John Nicholas Newman, 1977 A textbook that offers a unified treatment of the applications of hydrodynamics to marine problems The applications of hydrodynamics to naval architecture and marine engineering expanded dramatically in the 1960s and 1970s This classic textbook originally published in 1977 filled the need for a single volume on the applications of hydrodynamics to marine problems The book is solidly based on fundamentals but it also guides the student to an understanding of engineering applications through its consideration of realistic configurations The book takes a balanced approach between theory and empirics providing the necessary theoretical background for an intelligent evaluation and application of empirical procedures It also serves as an introduction to more specialized research methods It unifies the seemingly diverse problems of marine hydrodynamics by examining them not as separate problems but as related applications of the general field of hydrodynamics The book evolved from a first year graduate course in MIT's Department of Ocean Engineering A knowledge of advanced calculus is assumed Students will find a previous introductory course in fluid dynamics helpful but the book presents the necessary fundamentals in a self contained manner The 40th anniversary of this pioneering book offers a foreword by John Grue Contents Model Testing The Motion of a Viscous Fluid The Motion of an Ideal Fluid Lifting Surfaces Waves and Wave Effects Hydrodynamics of Slender Bodies

Ship Resistance and Propulsion Anthony F. Molland, Stephen R. Turnock, Dominic A.
