Authored by two leading green design educators, MEEB provides the most current information on low energy architecture including topics like Context, comfort, and environmental resources. Indoor air quality and thermal control, Illumination, acoustics, and electricity, Fire protection, signal systems, and transportation. Occupant comfort and building usability are the most critical factors in the success of a building design, and with environmental concerns mounting, it's becoming more and more important to approach projects from a sustainable perspective from the very beginning.
