## **Nmathematics November 2014:**

**The Training of African Teachers in Natal from 1846-1964** Nicolas Schicketanz, 2024-06-07 The history of African teacher training in Natal is one of the most neglected and under researched aspects of educational history This book attempts to set out the administrative history of this field as a first step in stimulating the further research that is so urgently needed Print edition not for sale in Sub Saharan Africa

*Family Violence in Japan* Fumie Kumagai, Masako Ishii-Kuntz, 2016-02-04 This book provides fresh sociological analyses on family violence in Japan Aimed at an international audience the authors adopt a life course perspective in presenting their research Following a comprehensive overview of family violence in Japan in both historical and contemporary contexts it then goes on to define the extent and causes of child abuse intimate partner violence filial violence and elder abuse In doing so the book is the first of its kind to look at these different types of violence in Japanese families and simultaneously incorporate historical development of individuals and intergenerational factors Furthermore its reliance on the life course perspective enables readers to obtain a broader understanding of family violence in the country Written by five Japanese family sociologists who have identified various major sociocultural characteristics that either induce or suppress family violence in Japan it is a valuable resource not only to scholars and students of the topic but also to those specializing in sociology psychology anthropology and comparative family studies around the globe

*The Great Mathematicians of Bharat* Partha Pratim Ray , 2023-12-20 The Great Mathematicians of Bharat emerges as a seminal work aligning perfectly with the vision of the National Education Policy NEP 2020 which emphasizes the integration and appreciation of Indian Knowledge Systems IKS in contemporary education This book meticulously documents the rich legacy of India s mathematical geniuses serving as a crucial resource in rekindling interest and respect for Bharat s profound mathematical traditions It underscores the symbiotic relationship between cultural ethos and scientific inquiry highlighting how Indian mathematicians not only contributed to the field of mathematics but also how their work was deeply interwoven with Hindu spiritual and cultural practices By chronicling the journey from ancient sages to modern masters the book provides a comprehensive view of the evolution of mathematical thought in Bharat thus fulfilling NEP 2020 s objective of integrating indigenous knowledge with modern academic frameworks In doing so it not only educates but also inspires setting a precedent for future academic endeavours to explore and celebrate India s rich intellectual heritage

**The Proceedings of the 12th International Congress on Mathematical Education** Sung Je Cho, 2015-02-10 This book comprises the Proceedings of the 12th International Congress on Mathematical Education ICME 12 which was held at COEX in Seoul Korea from July 8th to 15th 2012 ICME 12 brought together 3500 experts from 92 countries working to understand all of the intellectual and attitudinal challenges in the subject of mathematics education as a multidisciplinary research and practice This work aims to serve as a platform for deeper more sensitive and more collaborative involvement of all major contributors towards educational improvement and in research on the nature of

teaching and learning in mathematics education It introduces the major activities of ICME 12 which have successfully contributed to the sustainable development of mathematics education across the world The program provides food for thought and inspiration for practice for everyone with an interest in mathematics education and makes an essential reference for teacher educators curriculum developers and researchers in mathematics education The work includes the texts of the four plenary lectures and three plenary panels and reports of three survey groups five National presentations the abstracts of fifty one Regular lectures reports of thirty seven Topic Study Groups and seventeen Discussion Groups *New Challenges in Grid Generation and Adaptivity for Scientific Computing* Simona Perotto, Luca Formaggia, 2015-04-27 This volume collects selected contributions from the Fourth Tetrahedron Workshop on Grid Generation for Numerical Computations which was held in Verbania Italy in July 2013 The previous editions of this Workshop were hosted by the Weierstrass Institute in Berlin 2005 by INRIA Rocquencourt in Paris 2007 and by Swansea University 2010 This book covers different though related aspects of the field the generation of quality grids for complex three dimensional geometries parallel mesh generation algorithms mesh adaptation including both theoretical and implementation aspects grid generation and adaptation on surfaces all with an interesting mix of numerical analysis computer science and strongly application oriented problems

**System Modeling and Optimization** Lorena Bociu, Jean-Antoine Désidéri, Abderrahmane Habbal, 2017-04-10 This book is a collection of thoroughly refereed papers presented at the 27th IFIP TC 7 Conference on System Modeling and Optimization held in Sophia Antipolis France in June July 2015 The 48 revised papers were carefully reviewed and selected from numerous submissions They cover the latest progress in their respective areas and encompass broad aspects of system modeling and optimization such as modeling and analysis of systems governed by Partial Differential Equations PDEs or Ordinary Differential Equations ODEs control of PDEs ODEs nonlinear optimization stochastic optimization multi objective optimization combinatorial optimization industrial applications and numeric of PDEs Focus On: 100 Most Popular

**Examining the Phenomenon of “Teaching Out-of-field”** Linda Hobbs, Günter Törner, 2019-01-01 This book identifies and surveys the major themes around out of field teaching that is teaching subjects or year levels without a specialization This has been an issue in many countries for some time yet until recently there has been little formal research and poor policy responses to related problems This book arises out of collaborations between members of an international group of researchers and practitioners from Australia Germany Ireland England South Africa Indonesia and the United States Cross national comparisons of ideas through case studies descriptions of practice and research data interrogates the experiences practices and contexts relating to out of field teaching In particular the book considers the phenomenon of out of field teaching in relation to national policy contexts local school leadership practices professional development The book represents an essential contribution on a highly topical issue that has implications for quality and equitable education around the globe
