Wilson, 2014-04-17 High quality original writing doesn't happen by accident; it results from a logical inquiry based process. Educators will be able to apply the concepts and techniques in this book to help their students master the critical writing process. Many students tremble at the mere thought of the dreaded research paper when in fact the inquiry process that should be applied for a writing project should be an engaging and exciting mental activity. This work explains how teachers and librarians can guide the critical writing process to go hand in hand with inquiry and produce logical and carefully honed papers. *The Critical Writer Inquiry and the Writing Process* starts with a general treatment of inquiry to

detailed coverage of specific teaching strategies explaining how critical writers should make the proper emendations during prewriting and while drafting as well as during the revising process The book presents fresh information and teaching techniques that can be applied by anyone in the field of education with students of any grade level examples from kindergarten through instructors in teacher training are included **Relentless Reformer** Robyn Muncy, 2016-10-11

Josephine Roche 1886 1976 was a progressive activist New Deal policymaker and businesswoman As a pro labor and feminist member of Franklin D Roosevelt s administration she shaped the founding legislation of the U S welfare state and generated the national conversation about health care policy that Americans are still having today In this gripping biography Robyn Muncy offers Roche s persistent progressivism as evidence for surprising continuities among the Progressive Era the New Deal and the Great Society Muncy explains that Roche became the second highest ranking woman in the New Deal government after running a Colorado coal company in partnership with coal miners themselves Once in office Roche developed a national health plan that was stymied by World War II but enacted piecemeal during the postwar period culminating in Medicare and Medicaid in the 1960s By then Roche directed the United Mine Workers of America Welfare and Retirement Fund an initiative aimed at bolstering the labor movement advancing managed health care and reorganizing medicine to facilitate national health insurance one of Roche s unrealized dreams In *Relentless Reformer* Muncy uses Roche s dramatic life story from her stint as Denver s first policewoman in 1912 to her fight against a murderous labor union official in 1972 as a unique vantage point from which to examine the challenges that women have faced in public life and to reassess the meaning and trajectory of progressive reform *The First Atomic Bomb* Jim Mangi, 2022-06-20

While German and Japanese scientists also labored unsuccessfully to create an atomic bomb by the summer of 1945 the American led team was ready to test its first weapon As the clock ticked down to the detonation time of 05 30 hours on 16 July 1945 the nervous team of technicians and scientists waited ten miles away from Ground Zero deep in the New Mexico desert No one knew how powerful the explosion would be or whether even at such a distance they would be safe from the blast Even so some chose to observe the detonation from a point four miles nearer at the control bunker but then no one was even sure that the bomb would work What if that is actually what happened Under schedule pressure from the White House the scientists assembled the device in part with tape and tissue paper knowing some components were flawed These are verifiable facts It means that as many of those who gathered in the New Mexico desert feared at the time the bomb might not have worked during that first test In *The First Atomic Bomb* Jim Mangi explores what might happened in the event that the world s first atomic bomb had not been ready for use when it was How would this have affected the end of the war in the Pacific and indeed the Second World War as a whole Would Emperor Hirohito s armed forces have battled on When might Colonel Paul W Tibbets at the controls of his Boeing B 29 Superfortress Enola Gay have then made his historic flight over Hiroshima and would that city even have remained the target How would Stalin and the Soviets have reacted to such developments and how would this

have played out in the post war world

Wiegratz,2016-11-17 This book offers a fresh take on a major question of global debate what explains the rise in economic fraud in so many societies around the world The author argues that the current age of fraud is an outcome of not only political economic but also moral transformations that have taken place in societies reshaped by neoliberalism Using the case of Uganda the book traces these socio cultural and especially moral repercussions of embedding neoliberalism Uganda offers an important case of investigation for three reasons the high level of foreign intervention by donors aid agencies international organisations NGOs and corporations that have tried to produce the first fully fledged market society in Africa there the country s reputation as having adopted neoliberal reforms most extensively and the intensification of fraud in many sectors of the economy since the early 2000s The book explores the rise and operation of the neoliberal moral economy and its world of hard and fraudulent practices It analyses especially the moral economic character of agricultural produce markets in eastern Uganda It shows that neoliberal moral restructuring is a highly political contested and conflict ridden process predominantly works via recalibrating the political economic structure of a country and deeply affects how people think and go about earning a living and treat others with whom they do business The book offers an in depth data based analysis of the moral climate of a market society in motion and in so doing offers insights and lessons for elsewhere in the Global South and North **Education for people and the planet: Creating sustainable futures for all**

Moore,2025-03-11 When women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained in postconflict societies In Women s Work Jennifer Moore presents a reimagined theory of peacebuilding and transformative justice based on the experiences and insights of women farmers and microentrepreneurs who lived through protracted civil conflicts drawing on seven years of interviews with women activists across ten communities five in the Acholi region of Northern Uganda and five in the Moyamba and Koinadugu Districts of

Sierra Leone Despite the important differences between the preconflict and conflict histories and demographics of the two countries Moore finds commonalities in the practical yet visionary approaches to community life emerging from the core values daily activities and long range goals shared by rural cooperative members in both regions Collective survival communal healing and conflict resolution define the rhythm of these women s daily lives as they go about building peace piecemeal They reject punitive retribution models and demand instead a peacebuilding model that advocates for advances in material well being the acknowledgment of state accountability for community suffering and reconciliation and restoration of community networks But most important Moore amplifies these women s voices when they insist that legal equality for women and healthy partnerships between women and men are also essential components to enduring transformation of their societies Moore theorizes what peacebuilding look like if it were modeled on these women led matriarchically structured communities that proved not only to be effective at holding governments accountable but also to have the capacity to feed their people and revitalize their local economies Women s Work shows that when women have full socioeconomic citizenship as well as equitable and respectful partnerships with men transformative justice can be sustained through the arts of collective livelihood violence free conflict management and celebration **Security/Capital** Rigakos George S.

Rigakos,2016-03-18 What is security and what is its relationship to capitalism George S Rigakos explosive treatise charts the rise of the security industrial complex Starting from a critical appraisal of productive labour in the works of Karl Marx and Adam Smith Rigakos builds a conceptual model of pacification based on practices of dispossession exploitation and the fetish of security commodities Rigakos argues that a defining characteristic of the global economic system is its ability to productively sell in security to those it makes insecure Materially and ideologically the security industrial complex is the blast furnace of global capitalism fuelling the perpetuation of the system while feeding relentlessly on the surpluses it has exacted
