BIOLOGY: Evolution

Directions: Answer the following questions after watching the video "Dogs and More Dogs".

1. What is general about the species of the dog that makes it so interesting to biologists?

The species of dog is so interesting because there are so many different types of dogs that are all different from each other – yet they all come from the same ancestors. The whole world of domesticated breeds are based on that original 15,000-year-old dog.

2. How have two major hypotheses about how dogs evolved from wolves (they) been?

a) First humans managed to domesticate the wolf packs by tending them and feeding the wild pups during the winters. b) First people were killing the foxes and they learned to get and live on, nearby around humans in the early Neolithic times as useful partners (hunting dogs).

3. What was the observation in the Tjorne dogs that supported the hypothesis?

The observation in the Tjorne dogs refers to the extremely unusual canine jaw that is like that of a human. Scientists thought that because humans were buried around human burials, bones, especially the skull, they would have been buried. This unique trait of Tjorne dogs observation indicates an ancient role in the Neolithic period. Many animals are being kept and raised as human companions and it is difficult to explain it. Experts say this could have been just a few thousands of years ago.

4. What is the reason to find some way to explain physical differences between dogs and wolves. What are the major differences?

Some major differences between dogs and wolves are that dogs have smaller, more slender than generally, but I don't think that's what's really true. They would be. Another difference is that most dogs have floppy ears while most wolves don't. Dogs also have curled up tails while wolves don't.

5. Which evidence from dogs were, partly made and built up, since it would have helped to domesticate. Do you think that makes sense? Please show the experiment in the video (dog)?

The experiment in the video shows that the features that dogs have developed compared to the

Dogs would live longer if ... Jutta Ziegler, 2014-06-13 Millions of cats and dogs live in European and American households, and almost all of them are regularly treated with far too many and useless vaccinations, chemical coshes called medicines, and absurd diet meals which make them ill. In her bestselling tell-all book *Dogs would live longer if*, veterinarian Dr. Jutta Ziegler points out everything that is going wrong in veterinary practice. She reveals the interdependence of the veterinary business and the animal feed industry and offers case examples to explain how our pets should NOT be fed and treated. This book offers important information and advice for the responsible pet owner on how to protect their animal and themselves against corrupt and unscrupulous veterinarians for whom money is more important than ethics, and who opt to put on the line the lives of the animals entrusted to them, giving priority to their own wallet. Pit Bull Bronwen Dickey, 2016-05-10 The hugely illuminating story of how a popular breed of dog became the most demonized and supposedly the most dangerous of dogs, and what role humans have played in the transformation. When Bronwen Dickey brought her new dog home, she saw no traces of the infamous viciousness in her affectionate, timid pit bull. Which made her wonder: How had the breed beloved by Teddy Roosevelt, Helen Keller, and Hollywood's Little Rascals come to be known as a brutal fighter? Her search for answers takes her from nineteenth-century New York City dogfighting pits, the cruelty of which drew the attention of the recently formed ASPCA, to early twentieth-century movie sets where pit bulls cavorted with Fatty Arbuckle and Buster Keaton, from the battlefields of Gettysburg and the Marne, where pit bulls earned presidential recognition, to desolate urban neighborhoods where the dogs were loved, prized, and sometimes brutalized. Whether through love or fear, hatred or devotion, humans are bound to the history of the pit bull. With unfailing thoughtfulness, compassion, and a firm grasp of scientific fact, Dickey offers us a clear-eyed portrait of this extraordinary breed and an insightful view of Americans' relationship with their dogs. *The Windsor Magazine*, 1899 **Change That Law Jo**
