

Ghost in Your Genes

PROGRAM OVERVIEW

NOVA explores how the epigenome—the body's complex chemical network that controls gene expression—plays a role in human biological destiny.

The program:

- notes that, after mapping the human genome, researchers wondered how so few genes could account for so much diversity among the species.
- recounts how one scientist determined how the deletion of a key sequence of DNA on human chromosome 15 could lead to two different syndromes depending on whether the deletion originated from the mother or the father.
- explains that this was the first human evidence that something other than genes themselves could determine how genes are expressed.
- provides an animation of two ways that scientists think the epigenome works to turn genes on and off.
- cites differentiation as an example of the epigenome at work—during development, cells switch on or off to differentiate cell function; as the cells divide they retain a memory of their cell type.
- notes that while the epigenome is normally incredibly stable, epigenetic switches sometimes can be thrown and later lead to disease.
- looks at how the epigenetic profiles of two 66-year-old twins are very different from that of two 6-year-old twins, suggesting that epigenetic changes accumulate over time.
- presents several experiments with rats that reveal how the epigenome works in an animal model.
- reports how epigenetic changes may promote disease by silencing tumor suppressor genes or activating oncogenes.
- reviews a clinical trial in which half the patients recovered after being treated with a drug designed to remove chemical tags silencing tumor suppressor genes.
- presents the work of two scientists looking for an epigenetic influence on autism.
- reports on a review of generations of historical records from a remote Swedish village that suggests epigenetic changes may be passed down through the generations.

BEFORE WATCHING

1. Epigenetic effects employ the chemical mechanisms involved with DNA. As a class, review the following definitions: DNA, chromosome, and genome (see Key Terms on page 3). Use a model of DNA to have students identify the two strands that make up DNA, the sugar-phosphate backbone, the individual nucleotide bases, and the nucleotide base pairs.
2. Review the concept of gene expression with students. *What is it?* (*Gene expression is the ability of a gene to produce a biologically active protein.*) To help students understand this process, use the graphic on page 2 to guide them through the process of transcription and translation. Once you have reviewed the process with students, have them work in pairs to transcribe and translate a gene online at: learn.genetics.utah.edu/units/basics/transcribe

AFTER WATCHING

1. Discuss the concept of epigenetics. *What is it?* (*Epigenetics is the study of the modifications to genes, such as by methylation, which do not involve changing the underlying DNA.*) How does normal gene expression differ from epigenetic effects on the genome?
2. The program raises some social and ethical implications regarding epigenetic effects. While scientists still don't know exactly what affects the epigenome or how it may be passed down to future generations, if lifestyle choices or environmental effects are passed down, what would students consider changing about their current lifestyle for any potential offspring they may have? How certain would they need to be that their epigenome was being affected before they made the change?

Taping rights: Can be used up to one year after program is recorded off the air.

Dreaming with God Alexandra De Avalon, 2014-11-07 In 1992 Alexandra De Avalon's son David was killed in an automobile accident. Soon after she felt his presence and their spiritual journey began. David has communicated to his mother what happened after his physical death. He validates that he is still alive through miracles that have never stopped. Alexandra shares in a very candid way her spiritual journey and what she does to help heal her grief. When David made his transition, Alexandra De Avalon had a turning point in her life. She became a healer. This insightful book is about hope, miracles, and encouraging a spiritual healing process with grief. Breaking through the myth of death to the meaningfulness of the continued spiritual connection with those we love. Alexandra's exquisitely written journey invites us into a universal spirituality from Ancient Mayan ritual to love's transformative power. Her words awaken the beauty of prayer, hope, family, faith, and everyday miracles as they affirm the quality of life that unfolds as we listen to the wisdom of our hearts. If you know someone who has lost a loved one, give the gift of hope and share this book with them. Rev. Kid's Eye View of Science Susan Kovalik, Karen D. Olsen, 2010-09-08 Examines learning science from multiple perspectives including the child's perspective. Guides readers through the steps of igniting students' natural sense of wonder, incorporating brain research, integrating science concepts with other subjects, and applying science to daily life. Demonstrates how to teach science conceptually through the lens of big ideas such as change, interdependence, and adaptation.

BattleTech Legends: Roar of Honor Blaine Lee Pardoe, 2011-08-15 **ORDERS ARE ORDERS** Angela Bekker is a rising star in the Ghost Bear Clan. Devoted to duty and honor, relentless in the pursuit of flawless victory, a prime example of Clan excellence in mind and body. So when she receives order to form a new Trinary from scratch, she jumps at the chance to have her own command. Especially since they are to be stationed on the planet Toffen at the leading edge of Ghost Bear space. But what is an honor for some is an opportunity to strike for others. Led by the bloodthirsty Dirk Radick, forces of Clan Wolf launch an assault to take the valuable planet from the inexperienced troops. But the hunters soon become the hunted as the Stalking Bears live up to their name. Only when the smoke clears does Angela realize that great honor comes at a great price, one she may not be willing to pay.

Roar of Honor Blaine Lee Pardoe, 1999 The new book based on the top-selling CD-ROM game *Ghost Bear Commander*. Angela Bekker has been sent to the strategically important planet of Toffen where she faces ambush by a rival clan. Are her unorthodox tactics and sheer bravery enough to pull her troops through this galactic hell?
