In the article "Foreign News at a Crisis Point," Peter S. Goodman **eloquently** argues the 'point' that news organizations should increase the amount of professional foreign news coverage provided to people in the United States. Goodman builds his argument by using facts and evidence, addressing the counterarguments, and **couching** it all in **persuasive** and **compelling** language.

Goodman begins the article by **bombarding** the reader with facts and statistics. He states that, according to a census conducted by the American Journalism Review, the number of full-time foreign news correspondents in the United States dropped from 307 in 2003 to 234 in 2011. In addition, the AJR survey also discovered that "the space devoted to foreign news [in American papers] had shrunk by 53 percent" in the last 25 years.

Beginning the article with all of these facts and figures has a couple of **strengthening** effects on Goodman's argument. First, by starting out with hard evidence, Goodman lays the groundwork of his own **credibility**. He's not just writing an opinion piece - his opinion is backed by the truth. This will bring the readers onboard and make them more likely to trust everything else he says. Second, because Goodman presents these facts without much explaining/interpreting, the reader is forced to do the math herself. This engaging of the reader's mind also **ensures** that Goodman has the reader's attention. When the reader does the math to find a drop of 73 full-time foreign news correspondents employed by US papers in just 8 short years, she will find herself **predisposed** to agree with Goodman's call for more professional foreign news reporting.
