

Rain Forests

They're really half a world away,
There's nothing we can do.
"Rain Forests" might be just two words
To kids like me and you.

They're really somewhere over there.
I may not even see
A **Rain Forest** in my entire life.
What should it mean to me?

I know that in these **Rain Forests**
That I may never see,
Half the world's plants, animals and insects
Live in harmony.

I know that trees are being cut,
Faster than we know.
These trees are where the creatures live,
So now where will they go?

So, I know they're half a world away,
Rain Forests I can't see.
But I can learn and understand
Because the future starts with me!

You can make a difference.

Metaphor and Argumentation in Climate Crisis Discourse Anaïs Augé,2023-06-28 This volume sheds light on the argumentative role of metaphor in climate change discourse unpacking the ways in which stakeholders use specific metaphors to influence perceptions of the climate crisis While existing research has explored the explanatory function of metaphors in communication on climate change this book offers an alternative view one which posits that metaphors can go beyond disseminating scientific observations to promoting biases in the depiction of these observations Aug analyses oft used ideas in climate change communication such as greenwashing drawn from a wide ranging corpus spanning media discourse scientific discourse NGO communications political speech and social media messages in English The book presents an overview of different arguments conveyed through metaphors around five key themes climate change mitigation the evolution of climate change global and local effects the significance of climate change in specific countries and the relationship between climate change and other contemporary social issues The volume highlights how the complexity of climate change often necessitates the use of metaphor and the value of further research on the argumentative function of metaphor in elucidating its ideological dimensions in climate crisis discourse This book will be of interest to scholars in discourse analysis corpus linguistics cognitive linguistics and environmental communication

Carleton Papers in

Applied Language Studies ,1997 **The Ethnobotany of Eden** Robert A. Voeks,2018-06-27 In the mysterious and pristine forests of the tropics a wealth of ethnobotanical panaceas and shamanic knowledge promises cures for everything from cancer and AIDS to the common cold To access such miracles we need only to discover and protect these medicinal treasures before they succumb to the corrosive forces of the modern world A compelling biocultural story certainly and a popular perspective on the lands and peoples of equatorial latitudes but true Only in part In *The Ethnobotany of Eden* geographer Robert A Voeks unravels the long lianas of history and occasional strands of truth that gave rise to this irresistible jungle medicine narrative By exploring the interconnected worlds of anthropology botany and geography Voeks shows that well intentioned scientists and environmentalists originally crafted the jungle narrative with the primary goal of saving the world's tropical rainforests from destruction It was a strategy deployed to address a pressing environmental problem one that appeared at a propitious point in history just as the Western world was taking a more globalized view of environmental issues And yet although supported by science and its practitioners the story was also underpinned by a persuasive mix of myth sentimentality and nostalgia for a long lost tropical Eden Resurrecting the fascinating history of plant prospecting in the tropics from the colonial era to the present day *The Ethnobotany of Eden* rewrites with modern science the degradation narrative we've built up around tropical forests revealing the entangled origins of our fables of forest cures
