Perturbateurs Endocriniens La Menace Invisible:

Perturbateurs endocriniens François Veillerette, Marine Jobert, 2015-03-12T00:00:00+01:00 Que nous arrive-t-il ? Une nouvelle menace invisible s'attaque à la santé humaine. Ce sont les perturbateurs endocriniens. Inconnus il y a 25 ans, ils mobilisent aujourd'hui des milliers de scientifiques travers le monde qui cherchent à percer le secret de ces substances chimiques qui dérèglent le système hormonal. Bisphénol A, phtalates, pesticides, retardateurs de flamme. La liste est longue des produits d'usage courant qui renferment ces centaines de poisons suspects de favoriser cancers, diabète, obésité et autres maladies de la reproduction. Ils se trouvent dans l'air que nous respirons, les aliments que nous mangeons, l'eau que nous buvons, dans les habits et les cosmétiques que nous utilisons chaque jour. Un scandale autorisé par la réglementation exploitée par les industriels et tolérée par les pouvoirs publics. Pour la première fois en France, un livre fait le point sur la bombe sanitaire que constituent les perturbateurs endocriniens. Qui sont-ils ? Quand sommes-nous exposés ? Pourquoi sommes-nous si mal protégés ? Une révolution de l'espace est en cours. Et elle se déroule dans l'ignorance et l'indifférence quasi générales. Marine Jobert est journaliste spécialisée dans les questions environnementales. François Veillerette, militant écologiste, est le porte-parole de l'association Générations futures. Ils ont publié ensemble *Le Vrai Scandale des gaz de schiste* en 2011.

The Contamination of the Earth François Jarrige, Thomas Le Roux, 2021-11-16 The trajectories of pollution in global capitalism from the toxic waste of early tanneries to the poisonous effects of pesticides in the twentieth century. Through the centuries the march of economic progress has been accompanied by the spread of industrial pollution. As our capacities for production and our aptitude for consumption have increased so have their byproducts: chemical contamination from fertilizers and pesticides, diesel emissions, oil spills, a vast plastic continent found floating in the ocean. *The Contamination of the Earth* offers a social and political history of industrial pollution, mapping its trajectories over three centuries from the toxic wastes of early tanneries to the fossil fuel energy regime of the twentieth century.

Perturbateurs endocriniens : la guerre est déclarée !
Odile Bagot, 2020-05-27 Quand on commence à se pencher sur la liste des perturbateurs endocriniens et de leurs effets, il y a de quoi tomber de sa chaise. Bisphénol, glyphosate, parabène. Nous découvrons que nous sommes du sol au plafond, chez soi comme à l'extérieur, dans notre environnement comme dans les produits que nous utilisons ou que nous ingérons, submergés par ces molécules ou agents chimiques. Ils sont la cause de nombreux dérèglements et peuvent chez l'être humain concourir au développement de certaines pathologies inquiétantes. Comment en sommes-nous arrivés là et que pouvons-nous faire ? Odile Bagot, médecin gynécologue de son état, s'est intéressée de près à ces substances capables d'interférer avec notre système hormonal. Grâce à une documentation pointue, sa rigueur scientifique et son approche bienveillante, ainsi qu'à son expérience de médecin, Odile Bagot nous offre une enquête passionnante révélant l'un des plus grands scandales sanitaires du siècle dans un langage à la fois simple et vivant. Habillée de sa plus belle blouse et armée de sa plume, elle nous accompagne dans la compréhension des conséquences les plus néfastes des perturbateurs et surtout nous dévoile des conseils concrets et pratiques accessibles à tous et
