Petroleum Economics Jean Masseron, 1990 *Petroleum Economics* Jean Masseron, 1990 The History of Petroleum Exploration on Barbados, 1865-1985 Sylvan Spooner, 2024-10-28 This book documents the history of the Barbadian petroleum industry and the effort of that island's black nationalist political elite to take control of the island's petroleum resources. In a direct challenge to the white Barbadian planter class, this group made it known that it wished to wrest from them ownership of the colony's petroleum rights. Stating that it would do so for the national good rather than for the good of the few who for centuries held power within the colony, the island's political leadership gave notice of its desire to disrupt the colonial order. The politically charged appropriation of this natural resource, which one member of the House of Lords called an unhealthy manifestation of self-expression, was a brazen and defiant stand against colonialism and imperialism filled with political risk for the island. This book documents petroleum exploration on Barbados from the mid nineteenth century to 1985 and examines the island's careful cultivation of political and foreign policy relationships as well as the machinations involved as the island strove to take control of its petroleum industry.

Oil and Gas Exploration and Production Nadine Bret-Rouzaut, Jean-Pierre Favennec, 2011 With contributions by D Babusiaux IFP Energies nouvelles, S Barreau IFP Energies nouvelles, P R Bauquis Total, N Bret Rouzaut IFP Energies nouvelles, A Ch trit Total, P Copinschi IFP Energies nouvelles, J P Favennec IFP Energies nouvelles, R Festor Total, E Feuillet Midrier IFP Energies nouvelles, M Grossin Total, D Guirauden Beicip V Lepez Total, P Sigonney Total et M Valette Total. The first edition of this book has been selected for inclusion in Choice's annual Outstanding Academic titles list. It has been rewarded for its excellence in scholarship and presentation, the significance of its contribution to the field, and its value as important treatment of the subject. The steps that lead to the production of oil and gas are diverse, complex, and costly. They are diverse because the detection of oil and gas involves input from many specialties ranging from geology to reservoir engineering. They are complex as shown by the development of the job of the petroleum architect who coordinates all the operations. They are costly as the investments for exploration and production represent more than half of all investments in the oil and gas sector. Moreover, exploration is a risky activity both from the technical and financial viewpoint; only one well in five produces marketable oil. Meanwhile, the areas for exploration and production are spread throughout the world. This book provides a complete overview of the stakes and challenges involved in oil and gas exploration and production. Following a historical review and a survey of the markets, the technical phases are covered, as are the evaluation of reserves, the estimation of investments and costs, the decision making and control processes, and the accounting, legal, and contractual

environment for these activities The book concludes with a discussion of the role of safety and of environmental and ethical issues This work which is designed for readers concerned with the various aspects of the oil and gas upstream sector is accessible to all This second edition takes into account the huge changes in the oil and gas industry particularly the large increases in oil prices investments and costs observed since the first edition This book is available in French under the title *Recherche et production du p trole et du gaz* Contents 1 Petroleum a strategic product 2 Oil and gas exploration and production 3 Hydrocarbon reserves 4 Investments and costs 5 Legal fiscal and contractual framework 6 Decision making on exploration and production 7 Information accounting and competition analysis 8 Health safety the environment ethics Bibliography Glossary Index
